IMPLICATIONS

Policy: The capital programme is required to be allocated and managed in accordance with the Council's Corporate Capital Strategy 2015/18.

Financial: Expenditure for capital purposes is primarily expenditure on the acquisition, reclamation or enhancement of assets (eg buildings, land, plant and machinery). "Enhancement" means substantially lengthening the useful life of the asset, substantially increasing its open market value or substantially increasing the use of the asset. Other expenditure for capital purposes can include computer costs (for use over a period exceeding one year) and incidental costs involved in a capital project (eg officers' salaries and professional fees). Anything not covered by "proper practices" must be treated as revenue expenditure.

As in previous years, and in accordance with proper accounting practice, the revenue allocations can be used to fund capital expenditure but under no circumstances can the capital allocation be used to fund revenue expenditure.

A list of good practice in the allocation of funding has been proposed by the Council's Chief Finance Officer in order to assist members when considering the allocation of the capital and revenue budgets. The list is as follows:

1. The funding should assist a scheme which contributes to meeting the Council's corporate priorities.
2. Allocate reasonable amounts to projects early to allow for effective planning and implementation.
3. Look for opportunities to maximise the effectiveness of the allocation through match funding.
4. Consider allowing some contingency for projects that may be presented during the year.
5. Try to avoid allocation of funds at the end of the financial year.
6. Consider the revenue consequences of capital schemes in terms of ongoing cost.

Legal: There are legal implications for a number of the proposals listed above in terms of necessary permissions, agreements and possible long-term liabilities and responsibilities.

Risk Management: The capital programme is required to be allocated and managed in accordance with the Council's policies and procedures. The proper management of the programme is intended to minimise any exposure to unnecessary risk associated with the programme and the individual schemes within it.

Health and Safety: The implementation of the programme has associated risks in terms of health and safety. The Council is required to meet all relevant legal requirements for the effective management of health and safety risk and has policies and procedures in place to ensure health and safety standards are maintained.

Climate Change: Some of the schemes identified will encourage the reduction of carbon emissions, such as traffic calming schemes and cycle facility provision.

Community Safety: A number of the schemes listed above have implications in terms of community safety. Wherever possible, the projects are managed in a way that enhances community safety.

Equality and Diversity: The capital programme is required to be allocated and managed in accordance with the Council's policies and procedures, including those relating to equality and diversity.

From the proceeds of last year's gala we made a donation to Louis Jenkins, the little boy from Colne who at the age of 18 months had his legs and some of his fingers amputated due to meningitis. He is now 5 years old and needs some new legs, which are quite expensive. Also, his mother and father want to have a wet room for him as it would make things easier.
