

Annexes to Healthier Lancashire & South Cumbria Draft Sustainability & Transformation Plan

DRAFT

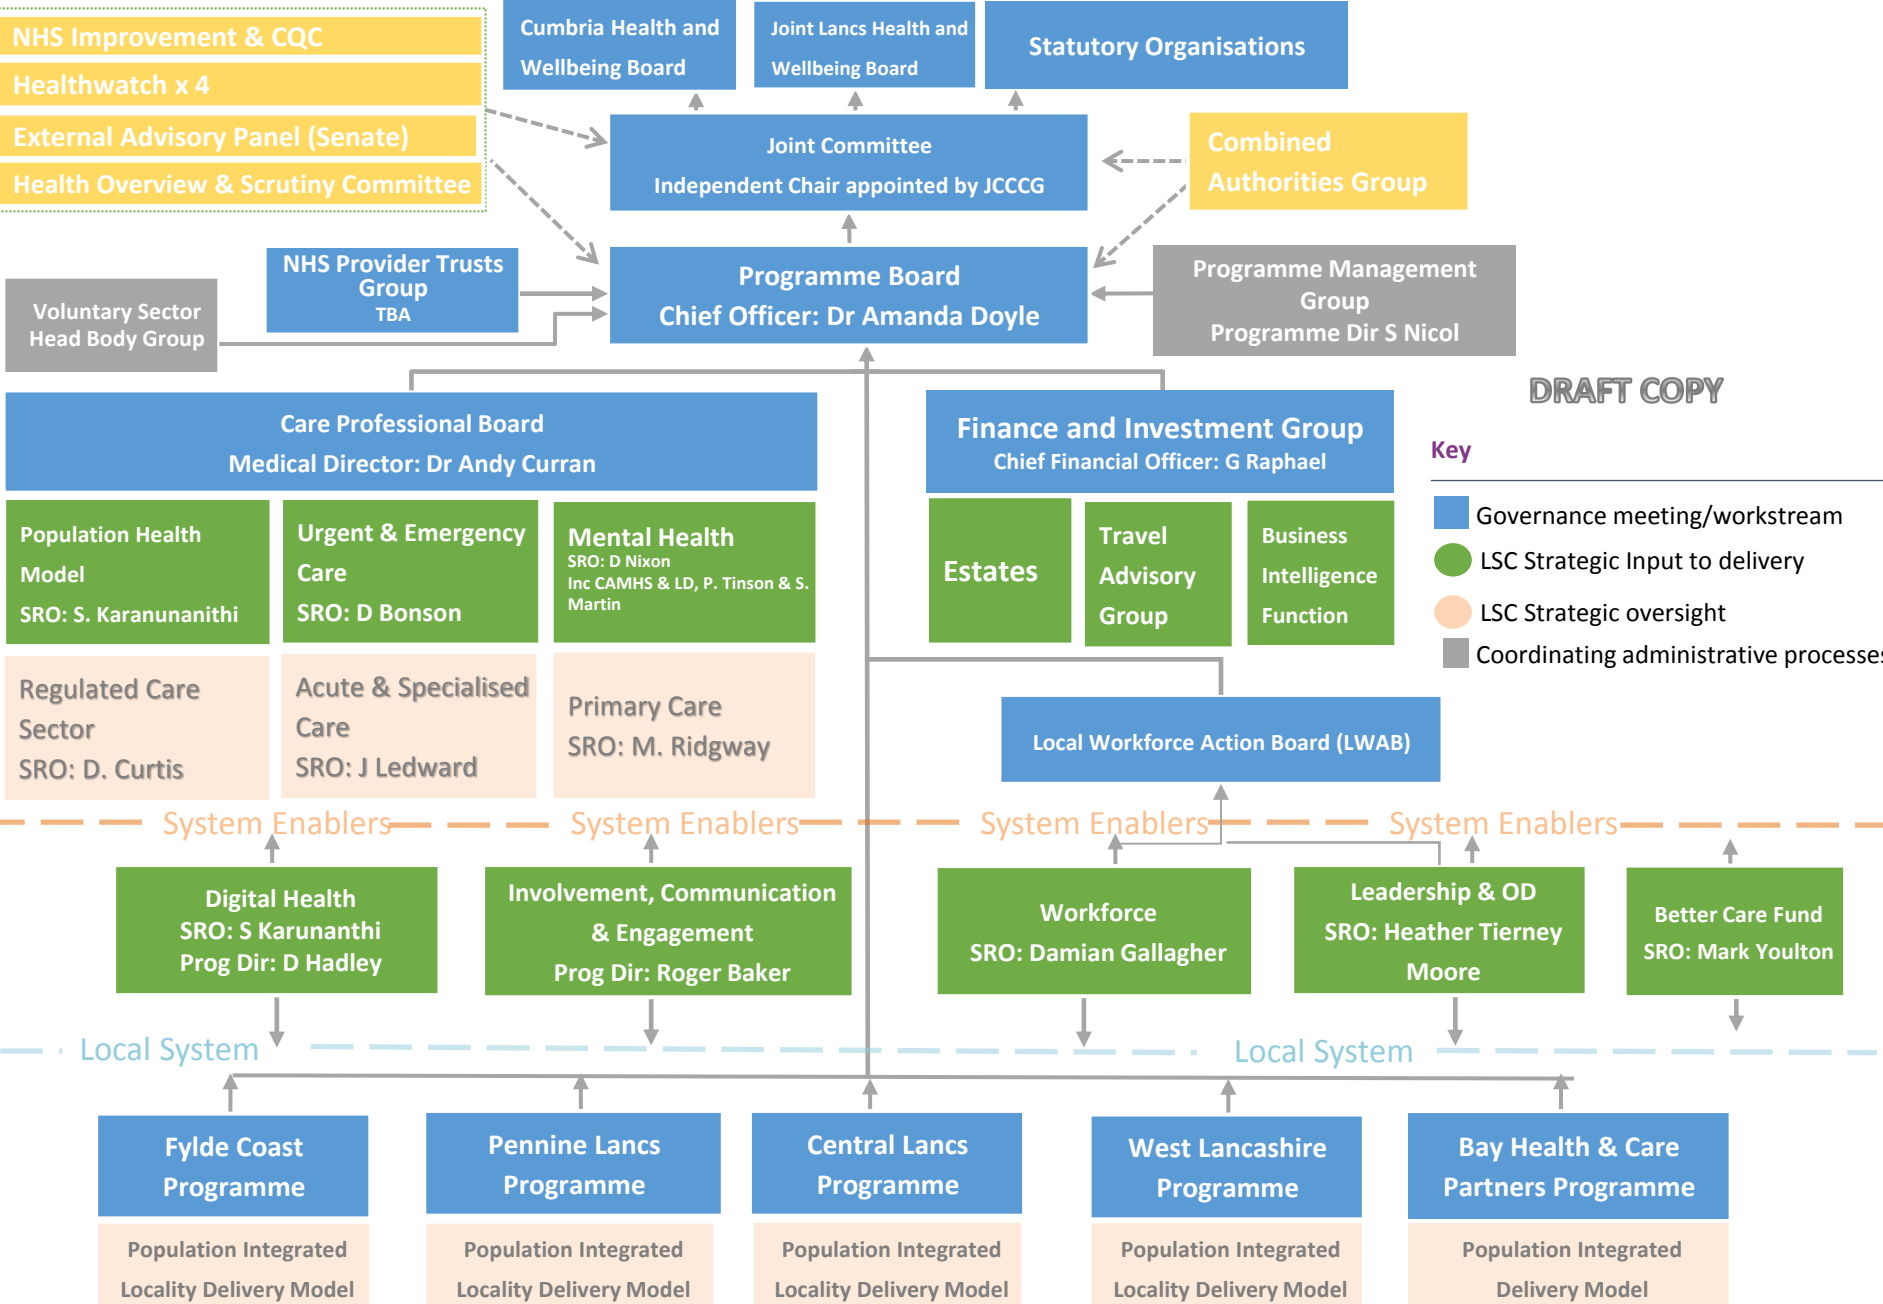

- A. GOVERNANCE AND LEADERSHIP
- B. LDP PLANS
- C. WORKSTREAM PLANS
- D. COMMUNICATIONS & ENGAGEMENT PLAN

- As health and care organisations across Lancashire and South Cumbria (L&SC) we have organised ourselves to work in an unprecedented collaboration to co-design, implement and deliver the changes required to transform the health and care services within our shared footprint. Working together we will ensure that services are delivered to meet the needs of our local populations and to generate improved health outcomes within our anticipated financial allocations. Our ambition is to see a radical large scale system change in health and care in L&SC, underpinned by the combined long-term commitment of organisational leaders across our footprint. We are doing this to deal with the financial, demographic and outcome challenges being felt more acutely in our area than elsewhere in England and consequently needing urgent, unified attention.
- The L&SC Sustainability and Transformation Plan 2016-21 will be an early output of the Healthier Lancashire & South Cumbria programme, setting out the case for change, priorities for collective action and plans for mobilisation of the solution-design phase of the change programme. L&SC will need to be built upon the commitment of the providers, commissioners, local government and other partners within each of our five localities to deliver the change required to better meet local needs through their local delivery plans (LDPs). The success of the L&SC STP will depend upon the alignment of its vision, ambition and priorities with the opportunities for collective action within the LDPs, and the effective focus of our combined efforts at the right level of the L&SC triangle.

4 Healthier Lancashire & South Cumbria Governance Structure

DRAFT COPY

- Key**
- Governance meeting/workstream
 - LSC Strategic Input to delivery
 - LSC Strategic oversight
 - Coordinating administrative processes

The Third Sector (also defined as the voluntary, community and faith sector and known in short as the VCFS) in Lancashire and South Cumbria consists of a diverse, vibrant and varied range of organisations delivering and supporting health and social care outcomes. There is a shared recognition that the assets and reach of this sector provide some of the solutions to address the complex challenges within this footprint.

The sector is a big player in Lancashire and South Cumbria as a whole and within then the five local delivery partnerships. Sector income in the county is approx. £500 million annually with 43% of this is from statutory/governmental sources which means that 57% comes from independent sources such as fundraising, earned income and trusts and foundations.

One of the strengths of Lancashire and South Cumbria's Third Sector is its diversity. Broadly speaking the sector consists of:

- Prevention services delivering programmes intended to prevent escalation of health and social care needs
- Provider organisations delivering contracted work, often commissioned by the NHS.
- 'Grass roots' small organisations with a strong volunteering base working around specific local themes or interests
- Provision of sports and other activities for recreation in local communities

It is estimated that there are approximately 5,100 registered charities within the Lancashire and South Cumbria STP footprint. As registered charities only make up 18% of the VCFS (NCVO estimation) it can be roughly estimated that there are around 28,333 Voluntary Community and Faith Organisations operating in Lancashire and South Cumbria. Most organisations have an established volunteer base that adds capacity and reach to their services and it is estimated that there are 668,000 active volunteers operating in Lancashire and South Cumbria.

Leadership, governance and connection to STP and Local Delivery Partnerships

Senior leaders within the third sector have limited capacity to engage in the evolving plans, partnership working and development of solutions, however there is a thirst and commitment to be involved in this process. Whilst, at present, not formalised there is a sector led advisory group formed in order to feed into the program board and a representative from that group sits on the program board. That group will be merged into a formalised and representative strategic body for Lancashire and South Cumbria and this will be an enhanced and re-configured version of the existing Third Sector Lancashire organisation. This group will ensure that there is a clear communication and influencing channel from the grass roots sector all the way to the program board.

There is representation within the six focus areas. This has been on an issue rather than a representative basis, i.e. the organisations that are playing a major role across the footprint have been invited as opposed to organisations being there on a tokenistic basis.

On a local delivery partnership footprint the sector is organising itself to influence and support the delivery of services. There have been secondments of senior VCFS leaders into the transformation partnerships and connected CCG and there has shared delivery plans developed. The sector itself is developing clear strategic leadership groups that sit within each of the five local delivery partnership areas and using those groups to identify representatives for the appropriate working groups. The sector sees STP has a real opportunity to develop its services and to influence the services being delivered by others.

Impact

However the picture and the outlook is not all rosy. Third sector funding investment is falling year on year however demand for service is increasing. As an example reablement and supported living funding has been dramatically reduced by Lancashire County Council as part of necessary cost savings however many organisations have chosen to continue providing the services transferring the cost onto their own resources. Essentially at a time where prevention is creeping up the agenda, the actual resources to achieve prevention (public health as an example) are being cut to the bone.

The Third sector has become the safety net (food banks and shelters are prime examples) and the economic impact of the lack of funding for those and other services will be further ill-health, increased long term conditions and the requirement for more acute services. The third sector is very aware that it plays a crucial role at both ends of scale. As a grass-root provider that can get to places that the statutory can't or, most importantly, at an earlier point in time than statutory can; but also as a strategic influencer with a real understanding of how prevention and transformational change can be achieved.

Bay Health & Care Partners LDP

DRAFT COPY

- The BHCP system footprint is the population of 365,000 people registered with 45 GP practices across 2 CCGs across an area of 1800km² serviced by 3 hospital sites
- The system is operating at a significant deficit and without major interventions the deficit appears likely to continue to increase to in excess of £160m by 2020/21
- We are coming to the end of our 1st year of delivery against the Better Care Together (BCT) strategy which was developed in partnership across 11 organisations and are working towards 6 priority areas.
- We are 6 months into our shadow Accountable Care System and working through our second gateway to set out our plans to develop our future accountable care model.

DRAFT COPY

P1

- Priority 1: Developing Out of Hospital (OOH) services including Integrated Care Communities, enhanced proactive care and case management and self care support programmes

P2

- Priority 2: Developing our planned care services supporting long term conditions in the community and pathway redesign reducing demand on hospital appointments

P3

- Priority 3: Developing Women & Children's services to wrap around services around the needs of the expectant mother and partner, children, their parents and families

P4

- Priority 4: Developing urgent care and integrated rapid response services with integrated access to unplanned, urgent and emergency care

P5

- Priority 5: Developing services to support older people living with frailty

P6

- Priority 6: Reaching financial balance across the health system

Initiatives which we will focus in 2016/17 – 17/18

- 1 Integrated Services: developing the 12 ICCs across the footprint
- 2 Long Term Conditions integrated pathways and teams
- 3 Planned care specialties: pathway redesign to target demand reduction and capacity management
- 4 Integrated maternity pathways
- 5 Integrated children's services
- 6 Integrated Urgent Care
- 7 Older people living with frailty
- 8 Baywide Cost Improvement Programme
- 9 Common Platform initiatives
- 10 Accountable Care Delivery Vehicle implementation

Analysis of Impact against Triple Aims

Care & Quality

- Leadership: A single or unitary leadership. With shared approach to strategic planning
- Workforce: Excellent recruitment/ retention rates
- Parity: All services experiencing parity of esteem
- Improvements in metrics reporting patient outcomes and efficiencies

Health & Wellbeing

- Community engagement: active involvement and responsibility, from bottom up, in our communities.
- Population health: delivery of population health outcomes across system.
- Co-production: co-design of services and pathways within the Bay Health area.
- Improvements in metrics reporting patient experience and community mobilisation

Finance & Efficiency

cumulative CIP/QIPP programmes totalling £76m (£10m 2016/17, £66m 2017/18 – 2020/21); CCGG saving of £5m through non-system QIPP; the receipt of recurrent Sustainability and Transformation Funding (STF) of £10.4m per annum; the BCT strategy benefitting the system by £18.1m; the UHMB Sustainability Programme of £20m; and further residual gap options of £32.5m.

An underpinning programme of transformational enablers includes:

- A.** Becoming a system with a **collective focus on the whole population**. **B.** Developing communities and social networks so that people have the skills and confidence to take responsibility for their own health and care in their communities. **C.** Developing the workforce across our system so that it is able to deliver our new models of care. **D.** Using **technology** to enable patients and our workforce to improve wellbeing, care, outcomes and efficiency. **E.** Building a Common Platform of system enablers **F.** Creating an Accountable Care Delivery Vehicle

Bay Health & Care Partners priorities against the 9 National Must Do's 1/3

9 Must Do's	Priorities					
	P1	P2	P3	P4	P5	P6
1. Develop a high quality and agreed STP , and subsequently achieve what you determine are your most locally critical milestones for accelerating progress in 2016/17 towards achieving the triple aim as set out in the Forward View .	We will work with the STP sharing learning from our Vanguard programme					
2. Return the system to aggregate financial balance . This includes secondary care providers delivering efficiency savings through actively engaging with the Lord Carter Provider Productivity work programme and complying with the maximum total agency spend and hourly rates set out by NHS Improvement. CCGs will additionally be expected to deliver savings by tackling unwarranted variation in demand through implementing the RightCare programme in every locality.	Work continues to support STP wide provider productivity work. CCGs continue to work through the RightCare programme					Baywide Cost Improvement programme delivers over £32m savings and includes 10 key areas that can be developed across the STP footprint
3. Develop and implement a local plan to address the sustainability and quality of general practice , including workforce and workload issues.	OOH programmes and enabling workforce projects will start to address this	We will work with the STP workforce programme to address these challenges on a wider footprint				

Bay Health & Care Partners priorities against the 9 National Must Do's 2/3

(continued) 9 Must Do's	Priorities					
	P1	P2	P3	P4	P5	P6
4. Get back on track with access standards for A&E and ambulance waits , ensuring more than 95 percent of patients wait no more than four hours in A&E, and that all ambulance trusts respond to 75 percent of Category A calls within eight minutes; including through making progress in implementing the urgent and emergency care review and associated ambulance standard pilots.	OOH work looking at reducing demand and supporting integrated discharge planning. Developing transitional care facilities in community	LTC pathway work looking at reducing demand on urgent & emergency care services in hospital	Integrated children's services will reduce demand on A&E and improve patient flow through the hospital	As a PACs vanguard we continue to develop urgent & emergency care services	Frailty project looking at reducing demand on A&E and improving patient flow in hospital through effective discharge planning	
5. Improvement against and maintenance of the NHS Constitution standards that more than 92 percent of patients on non-emergency pathways wait no more than 18 weeks from referral to treatment , including offering patient choice.		Planned care projects looking to reduce demand for new and FU appointments, delivering more clinics closer to home and reducing waiting times for elective care				
6. Deliver the NHS Constitution 62 day cancer waiting standard , including by securing adequate diagnostic capacity; continue to deliver the constitutional two week and 31 day cancer standards and make progress in improving one-year survival rates by delivering a year-on-year improvement in the proportion of cancers diagnosed at stage one and stage two; and reducing the proportion of cancers diagnosed following an emergency admission.	<div style="border: 1px solid black; padding: 10px; text-align: center;"> <p>Work is underway to join up the approach for Cancer services across the Bay as part of the integration of the 2 CCGs</p> </div>					

Bay Health & Care Partners priorities against the 9 National Must Do's 3/3

(continued) 9 Must Do's	Priorities					
	P1	P2	P3	P4	P5	P6
7. Achieve and maintain the two new mental health access standards : more than 50 percent of people experiencing a first episode of psychosis will commence treatment with a NICE approved care package within two weeks of referral; 75 percent of people with common mental health conditions referred to the Improved Access to Psychological Therapies (IAPT) programme will be treated within six weeks of referral, with 95 percent treated within 18 weeks. Continue to meet a dementia diagnosis rate of at least two-thirds of the estimated number of people with dementia.	We will work with the STP Mental Health programme					
8. Deliver actions set out in local plans to transform care for people with learning disabilities , including implementing enhanced community provision, reducing inpatient capacity, and rolling out care and treatment reviews in line with published policy.	We will work with the STP LD programme					
9. Develop and implement an affordable plan to make improvements in quality particularly for organisations in special measures. In addition, providers are required to participate in the annual publication of avoidable mortality rates by individual trusts.	All priorities are focussed on improvements in quality across the system with a population health system approach at the core .					

Central Lancashire LDP

DRAFT COPY

Introduction

- The Central Lancashire system footprint is the population of 390,000 people registered with 63 GPs across two CCGs – Greater Preston and Chorley South Ribble CCGs
- The system is experiencing increasing pressure and our modelling of the demography and financial challenges clearly shows that we need to respond with much greater transformation if we are to address our 'do nothing' gap of £95.5m by 2020/21.
- Our Local Delivery Plan "Our Health Our Care" has the overall aim of "equal and fair access to safe, effective and responsive health and social care for our communities that represent value now and in the future". This aim is underpinned by five specific objectives from which we have drawn the priorities below.
- We have identified five priorities for change, underpinned by four transformational enablers, which taken together will help us to eliminate our financial gap by 2020/21. In years one to two we will progress six key initiatives to establish early momentum and underpin future work.
- All of our plans are built on collaborative relationships and consensus amongst our system leaders which we will continue to develop to ensure the success of our STP, and which provide the foundations for an integrated health and social care system in the future

DRAFT COPY

Our priorities for the next 5 years

P1 **Priority 1:** To reduce variation and health inequalities, improving quality and outcomes across all pathways.

P2 **Priority 2:** To reduce avoidable activity within secondary care for both Non elective and Elective episodes

P3 **Priority 3:** To support Care Closer to Home by way of integrated neighbourhoods and localities for the whole population promoting self-care and self-help.

P4 **Priority 4:** Develop and enhance sustainable Primary Care through 'Out of Hospital' strategy.

P5 **Priority 5:** Redesign of Urgent and Emergency Care to include integrated urgent care services and ambulatory care pathways

Initiatives which we will focus in 2016/17 – 17/18

1. Comprehensive Urgent Care Work-stream including integrated urgent care centres, ambulatory care pathways, ICAP and frailty
2. Referral and demand management programmes in line with RightCare C4V, including Integrated MSK service procurement and referral management initiatives
3. To develop and Out of Hospital strategy and enhance GP Quality Contract to deliver Level 1, Level 2 and Level 3 services.
4. Develop and establish a frailty pathway across Primary, Secondary and Community Care
5. Develop an integrated health and care system for our communities focused around 10 integrated neighbourhoods.

Analysis of Impact against Triple Aims

Care & Quality

- Timely access to services to meet presenting needs
- Early intervention/prevention
- Seamless services and reduced hand-offs
- Supporting people to live safe and well in their own homes

Health & Wellbeing

- Improve individual and community resilience
- To reduce the health inequalities across the local population
- Encourage community catalyst initiatives

Finance & Efficiency

- Achieve and deliver against control totals
- Make efficient and effective use of the cost per head for the local population
- Comply with all statutory requirements

An underpinning programme of transformational enablers includes:

A. Becoming a system with a **collective focus on the whole population**. **B.** **Developing communities and social networks** so that people have the skills and confidence to take responsibility for their own health and care in their communities. **C.** **Developing the workforce** across our system so that it is able to deliver our new models of care. **D.** Using **technology** to enable patients and our workforce to improve wellbeing, care, outcomes and efficiency.

9 Must Do's	Central Lancashire priorities				
	P1	P2	P3	P4	P5
1. Develop a high quality and agreed STP , and subsequently achieve what you determine are your most locally critical milestones for accelerating progress in 2016/17 towards achieving the triple aim as set out in the Forward View .	STP prevention and OHOC Prevention, Early Help and Self Care work stream objectives and work programmes aligned. Measured by delivery of constitutional targets and indicators within the CCG assessment framework and RightCare.	Key milestones within urgent care work stream aligned to STP Acute and Specialist workstream but fast track those initiatives that are not dependent on the realignment of services across Lancashire. Measured by delivery of constitutional targets and indicators within the CCG assessment framework and RightCare.	Key milestones within the Out of Hospital work stream will align with the STP but fast track the review and redesign of pathways that are not STP dependent. Measured by delivery of constitutional targets and indicators within the CCG assessment framework and RightCare.	Development of a sustainable primary care model as an integral part of the Out of Hospital Strategy. Measured by delivery of constitutional targets and indicators within the CCG assessment framework and the key performance indicators in the GP Quality Contract.	Redesign of urgent and emergency services locally but consistent with the STP in terms of configuration across Lancashire. Measured by delivery of constitutional targets and indicators within the CCG assessment framework and delivery of the new Urgent Care Service at Preston and Chorley.

Fylde Coast LDP

DRAFT COPY

The partner organisations in the Fylde Coast health economy are committed to working together to improve health outcomes for our population. Our aim is to develop a model of integrated and coordinated health and social care so that care is delivered seamlessly, sharing data and communicating better with each other and those in need of our services, their carers and families. In moving towards a financially sustainable care system we will have a single Fylde Coast cost improvement plan managed through a single programme management office which will move us towards an aggregate balanced position.

- The Fylde Coast system footprint is the population of c. 330,000 served by the GP practices within two CCGs: Blackpool and Fylde and Wyre.
- Our starting point is strong. We are the system in England that is participating in three national, interlinked initiatives (Vanguard, Test Bed & Healthy New Town) and we have a good track record of partnership working and collaboration across commissioners and providers of care.
- We have identified five priorities for change, underpinned by five transformational enablers, which taken together will help us to address our financial gap by 2020/21.

Initiatives which we will focus on in 2016/17 – 17/18

1. Continued implementation of our **New Models of Care**, with Extensive Care and Enhanced Primary Care provided across all neighbourhoods, and a growing focus on **self-care and patient activation** (Vanguard & Transformation Area)
2. Review and redesign **patient pathways across primary, community and secondary care** with a focus on conditions with high prevalence and/or significant opportunity for improvement (quality, patient experience & efficiency)
3. Review and redesign of **urgent and emergency care services** and associated points of entry into the system
4. Improve the utilisation and effective sharing of **digital health records** across the Fylde Coast and beyond
5. Lay the foundations for the **development of an accountable care system** / organisation developing shared functions and designing our accountability framework

Analysis of Impact against Triple Aims

DRAFT COPY

Care & Quality

- Improved access to 1^o care services
- Improved clinical outcomes, reflected in reduced mortality rates and reduced health inequalities
- Reduction in unnecessary hospital admissions and excess length of stay

Health & Wellbeing

- Targeted, proactive case management
- An increase in social prescribing to promote self-care and wellbeing
- Additional years of life
- Patient activation, empowering approach through Community Orientated Primary Care

Finance & Efficiency

- Identify what proportion of the financial challenge needs to be addressed at each level: organisation, LDP, STP
- A single Fylde Coast cost improvement programme
- A planning approach centred on best use of the 'Fylde Coast pound'

An underpinning programme of transformational enablers includes:

- A.** Becoming an **accountable care system / organisation** with a collective focus on the whole population. **B.** Developing a **workforce with redefined roles** that support the New Models of Care skill set requirements, and addresses the identified capacity / skills gaps.. **C.** Making **better use of our estate** to provide care in community-based settings, linked to wider social requirements, in a cost-effective way. **D.** Using **technology** to enable patients and our workforce to improve wellbeing, care, outcomes and efficiency. **E.** Ensuring **effective communication and engagement** with our population and our workforce

The Fylde Coast health economy will deliver these initiatives via several work programmes:

WP1	Enhanced GP Access	WP4	Mental Health	Each work programme has a Senior Responsible Officer, a Senior Responsible Clinicians and a Programme Lead.
WP2	WP7 Technology Urgent & Emergency Care	WP5	Planned Care	
WP3	WP8 Effective Use of Resources Care Model Delivery	WP6	Cancer	
	WP9 System Design

Pennine Lancashire LDP

DRAFT COPY

- The Pennine Lancashire system footprint is the population of the six boroughs of Blackburn with Darwen, Rossendale, Burnley, Pendle, Ribble Valley and Hyndburn.
- Our population of 531,000 people is served by a unitary authority, five district councils, one county council, two CCGs, 85 GP practices, 91 dentist practices, 152 pharmacies, 42 opticians and many voluntary and community sector groups, which are run independently and provide a range of primary care services.
- Our Case for Change clearly sets out the key demographic, inequality and financial challenges for Pennine Lancashire. We have put in place a robust partnership working, governance and assurance framework across the system to drive forward the planning and delivery of sustainable transformation to address our 'do nothing' gap by 2020/21.
- We have set out a clear vision, principles and commitments to shape and guide our local delivery plan
- Pennine Lancashire is committed to effective communication and engagement with our workforce, our public and politicians and a programme of engagement and communication work is already involving a wide range of stakeholders in the conversation about our shared future.

DRAFT COPY

P1

- We will create an effective, integrated, person and family centred Locality Services Model, incorporating NHS, Social Care, Primary Care and the Voluntary, Community and Faith sectors.

- P2 - We will transform urgent and emergency care to ensure that the people of Pennine Lancashire with urgent care needs will receive a highly responsive service that delivers care as close to home as possible. Those with serious or life-threatening conditions will be treated in centres with the very best expertise and facilities in order to maximise their chances of survival and a good recovery.

P3

- We will improve on all of our key 'Variations in Care' through standardisation of pathways and best practice interventions and improve the health and wellbeing outcomes of our population overall.

P4

- We will develop a comprehensive health promotion and wellbeing programme focussing on community resilience, disease prevention, citizen empowerment and the development of volunteering, through a single public sector approach working with the Voluntary, Community and Faith sectors.

P5

- We will take forward our Health Improvement Priorities (Respiratory, Cardiovascular, Frailty, Mental Health, Cancer, and Children and Young People) as part of our Solution Design Programme to ensure our transformation addresses key health outcomes for our population.

Initiatives which we will focus in 2016/17 – 17/18

1 Pilot **locality working** in test bed sites across the Pennine Lancashire footprint.

2 Set out and deliver an **A&E Recovery Plan** which will support the delivery of key constitutional and priority metrics and the transformation of urgent and emergency care.

3 Deliver an effective **Solution Design Programme** to develop the best possible Business Case for the transformation of services.

4 Undertake **Stakeholder Communications and Engagement** activity to inform and engage our workforce, public and politicians in the development of our plans for transformation.

5 Work across the system to design and deliver a **Sustainability and Efficiency** programme of work to meet financial control totals in 2016-17 and 2017-18.

6 Develop our approach to **Prevention** and identify the range of initiatives and interventions which can evidence effectiveness and a Return on Investment.

Analysis of Impact against Triple Aims

Care & Quality

- Reduce the number of people experiencing harm as a result of a fall
- Reduce the number of people experiencing harm as a result of medication
- Reduce the number of children and young people experiencing harm
- Referral to treatment times
- Reduce the number of unnecessary unplanned hospital admissions
- Reduce the number of people being admitted/readmitted to hospital.

Health & Wellbeing

- Increase the number of years that people live
- Increase quality of life and general wellbeing
- Reduce the dependency of people on services
- Address mental health

Finance & Efficiency

- Ensure the health and care system is financially balanced
- Achieve a shift in resources into prevention and early intervention
- Reduce CO2 emissions from estate
- Reduce the degree of workforce turnover
- Reduce the percentage of workforce days lost to sickness absence
- Increase the percentage of staff recommending Pennine Lancashire Health and Care as a good place to work.

An underpinning programme of transformational enablers includes:

- A. Workforce Transformation: One Workforce B. Better Use of Technology. C. Consistent and Clear Communications and Engagement With Our Public and Workforce D. Optimise the Use of Public Estate Across All Organisations: One Public Estate

Pennine Lancashire Key milestones, Owners, Risks, Governance & Interdependencies 1/2

	Initiatives which we will focus in 2016/17 – 17/18	Scheme Owner	Risks	Do you have governance in place for this?	Main Interdependencies
1	<p>Pilot Locality Working in Test Bed Sites</p> <p>Key milestones:</p> <ul style="list-style-type: none"> Establish single assessment process and case management framework across Pennine Lancashire (March 2017). Develop Pennine Lancashire Standard Operating Procedures for Locality Working (October 2016). First pilot operational (October 2016). Second pilot operational (April 2017). 	Sharon Martin	Short-term funding initiatives not sustained.	Locality Steering Group in Place	Primary Care Regulated Care Sector Urgent and Unscheduled Care Organisational plans
2	<p>A&E Recovery Plan</p> <p>Key milestones:</p> <ul style="list-style-type: none"> Delivery of Recovery Plan against the 4-hour target (December 2016) including phased delivery up to 2018 of the five mandated clinical priorities (streaming, development of an integrated virtual clinical 111 hub, transformation of ambulance services, patient flow and discharge) Consistent Walk-in offer which simplifies access for patients in Pennine Lancashire (April 2018) Development and integration of new models of Primary Care delivering extended access to weekend and evening appointments (April 2017). Development of key services for vulnerable people including A&E liaison services to support case management approaches to reduce frequent attendance from vulnerable groups (April 2017). 	Kevin McGee	Workforce capacity. Financial alignment. Changing culture and behaviours.	A&E Recovery Board in place.	Locality Care Acute and Specialist Services Regulated Care Sector
3	<p>Solution Design</p> <p>Key milestones:</p> <ul style="list-style-type: none"> Series of events completed (January 2017) Key products eg Case for Change and Quality Standards developed (January 2017) Draft Business Case completed (January 2017). 	Mark Youlton	Securing representation and participation in events.	Transformation Steering Group in place.	Pennine Lancashire workstreams Lancashire and South Cumbria workstreams.

Pennine Lancashire Key milestones, Owners, Risks, Governance & Interdependencies 2/2

	(continued) Initiatives which we will focus in 2016/17 – 17/18	Scheme Owner	Risks	Do you have governance in place for this?	Main Interdependencies
4	Stakeholder Communications and Engagement Key milestones: <ul style="list-style-type: none"> • Online presence via website and social media launched (July 2016) • Large-scale public engagement events held (October and November 2016) • Programme of focus groups and targeted engagement activity (October 2016 – March 2018). 	Marc Schmid Michelle Cloney	Negative press coverage aligned to national reputation of STPs.	Fully Engaged Steering Group in place	Solution Design Programme
5	Sustainability and Efficiency Key milestones: <ul style="list-style-type: none"> • Establishment of Pennine Lancashire Sustainability and Efficiency Group (September 2016) • Utilisation of RightCare and Carter data (March 2017) • Appointment of partner to support economic modelling (October 2016) • Evaluation of options and business cases (February 2017) 	Roger Parr	Timing of costs being released. Differential impact on partners within the system. Deliverables from business cases.	Sustainability and Efficiency Steering Group in place	Solution Design Programme Organisational plans
6	Prevention Key milestones: <ul style="list-style-type: none"> • Workshops to engage and develop approach (autumn 2016) • Identification of short list of interventions with evidence of effective effectiveness and Return on Investment (October 2016) • Implementation plan for delivery in place (January 2017). 	Dominic Harrison	Availability of evidence base .	Prevention Steering Group in place.	Locality Care

9 Must Do's	Pennine priorities				
	Locality Services Model	Urgent and Emergency Care	Improve Variations in Care	Health Promotion and Wellbeing	Health Improvement Priorities
1. Develop a high quality and agreed STP , and subsequently achieve what you determine are your most locally critical milestones for accelerating progress in 2016/17 towards achieving the triple aim as set out in the Forward View .	<ul style="list-style-type: none"> • LDP Solution Design Phase complete by January 2017 • LDP Pre-consultation Business Case in place by January 2017 • LDP Pre-consultation Business Case to set out proposals for achieving Triple Aim and Pennine Lancashire's Benefits Framework. 				
2. Return the system to aggregate financial balance . This includes secondary care providers delivering efficiency savings through actively engaging with the Lord Carter provider productivity work programme and complying with the maximum total agency spend and hourly rates set out by NHS Improvement. CCGs will additionally be expected to deliver savings by tackling unwarranted variation in demand through implementing the RightCare programme in every locality.	<ul style="list-style-type: none"> • Improved efficiency and productivity (Carter+) • Implementation of RightCare Pathways • Reductions in numbers of Procedures of Limited Clinical Value • Delivery of control totals 				
3. Develop and implement a local plan to address the sustainability and quality of general practice , including workforce and workload issues.					

(continued) 9 Must Do's	Pennine priorities				
	Locality Services Model	Urgent and Emergency Care	Improve Variations in Care	Health Promotion and Wellbeing	Health Improvement Priorities
4. Get back on track with access standards for A&E and ambulance waits , ensuring more than 95 percent of patients wait no more than four hours in A&E, and that all ambulance trusts respond to 75 percent of Category A calls within eight minutes; including through making progress in implementing the urgent and emergency care review and associated ambulance standard pilots.					<ul style="list-style-type: none"> • Increased number of calls transferred for clinical advice • Increase in 'see and treat' and 'hear and treat' • Reduced inpatient bed occupancy • Reduced length of stay • Discharge to assess in place • Implementation of the 'SAFER' bundle
5. Improvement against and maintenance of the NHS Constitution standards that more than 92 percent of patients on non-emergency pathways wait no more than 18 weeks from referral to treatment , including offering patient choice.					<ul style="list-style-type: none"> • Achievement of 92% standard • Reduction in Procedures of Limited Clinical Value • Improved patient experience
6. Deliver the NHS Constitution 62 day cancer waiting standard , including by securing adequate diagnostic capacity; continue to deliver the constitutional two week and 31 day cancer standards and make progress in improving one-year survival rates by delivering a year-on-year improvement in the proportion of cancers diagnosed at stage one and stage two; and reducing the proportion of cancers diagnosed following an emergency admission.					<ul style="list-style-type: none"> • Prevention and early intervention component in place • Increased proportions diagnosed earlier (ie at stage 1 and stage 2) • Reduced proportion of cancers diagnosed following emergency admission • Improved survival rates • Increase in patients receiving timely treatment

(continued) 9 Must Do's	Pennine priorities				
	Locality Services Model	Urgent and Emergency Care	Improve Variations in Care	Health Promotion and Wellbeing	Health Improvement Priorities
7. Achieve and maintain the two new mental health access standards : more than 50 percent of people experiencing a first episode of psychosis will commence treatment with a NICE approved care package within two weeks of referral; 75 percent of people with common mental health conditions referred to the Improved Access to Psychological Therapies (IAPT) programme will be treated within six weeks of referral, with 95 percent treated within 18 weeks. Continue to meet a dementia diagnosis rate of at least two-thirds of the estimated number of people with dementia.			<ul style="list-style-type: none"> IAPT RTT measures First episode of psychosis RTT measures Improved access to services Supporting self help and self care Dementia awareness, education and training 		
8. Deliver actions set out in local plans to transform care for people with learning disabilities , including implementing enhanced community provision, reducing inpatient capacity, and rolling out care and treatment reviews in line with published policy.					
9. Develop and implement an affordable plan to make improvements in quality particularly for organisations in special measures. In addition, providers are required to participate in the annual publication of avoidable mortality rates by individual trusts.					

West Lancashire LDP

DRAFT COPY

- The West Lancashire system footprint is the population of 111,000 people registered with GPs across five neighborhood areas.
- Our starting point is generally good, as the Out of Hospital Strategy is well on the way to being implemented via the community re-procurement. This goes live in April/May 2017. The CCG is also an associate member of the Cheshire/Merseyside STP in relation to its hospital patient flows.
- The system is experiencing increasing pressure and our modelling of the demography and financial challenges clearly shows that we need to respond with much greater transformation if we are to address our 'do nothing' gap of £8.4m by 2020/21.
- We have identified five priorities for change, underpinned by four transformational enablers, which taken together with the Healthier Lancashire and South Cumbria work will help us to eliminate our financial gap by 2020/21. In years one to two we will progress six key initiatives to establish early momentum and underpin future work.
- All of our plans are built on collaborative relationships and consensus amongst our system leaders which we will continue to develop to ensure the success of our LDP, and which provide the foundations for an integrated health and social care system in the future

P1

- Priority 1: Transform Community Services: "building the Future Together"; Delivering our new models of Care.

P2

- Priority 2: Transform outcomes for those experiencing the most challenging health inequalities

P3

- Priority 3: Transform outcomes in the most challenging long term conditions

P4

- Priority 4: Transform Urgent and emergency care

P5

- Priority 5: Transform planned care

Initiatives which we will focus in 2016/17 – 17/18

1. Implementing a new community provider model (akin to MCP) from April 2017. This is the cornerstone of the CCG's Out of Hospital Strategy and also includes joining up out of hospital urgent care (walk in centre, out of hours and acute visiting service).
2. Implement "Well Skelmersdale" asset based community approach in line with the "Well North" Programme aims.
3. Re-design the Musculoskeletal services in collaboration with health economy partners. This is a key RightCare priority.
4. Primary care transformation - exploring all aspects of GP federation . This links to out of hospital strategy and MCP model.
5. Sustainability of Southport hospital and progression of the mid-Mersey "Alliance" work as part of Mersey STP. This includes maternity and paediatric vanguard work.
6. Mental health

Analysis of Impact against Triple Aims

Care & Quality

New model focusses on quality and care improvements, reduction in variation , unmet need.
Planned care transformation promotes patient empowerment and reductions in unnecessary admissions

Health & Wellbeing

Asset based approach in Skelmersdale will help to reduce current life expectancy gap in West Lancashire (8 years between areas)
Reductions in over-hospitalization of patients

Finance & Efficiency

£8m gap by 2021. Local solutions deliver 75% of this gap. Wider STP working would need to deliver the remainder going forward.

DRAFT COPY

An underpinning programme of transformational enablers includes:

A. Becoming a system with a **collective focus on the whole population**. **B.** **Developing communities and social networks** so that people have the skills and confidence to take responsibility for their own health and care in their communities. **C.** **Developing the workforce** across our system so that it is able to deliver our new models of care. **D.** Using **technology** - West Lancs has progressed a number of initiatives as part of the digital health programme in Lancashire

	Initiatives which we will focus in 2016/17 – 17/18	Scheme Owner	Risks	Do you have governance in place for this?	Main Interdependencies
1	<p>Implementing a new community provider model (akin to MCP) from April 2017. This is the cornerstone of the CCG's Out of Hospital Strategy and also includes joining up out of hospital urgent care (walk in centre, out of hours and acute visiting service). write initiative here></p> <p>Key Milestones:</p> <ul style="list-style-type: none"> • Mobilisation November to March • Go Live in April 2017 	Jackie Moran	<p>Contractual and financial risks.</p> <p>Contingency planning.</p>	Project has its own Programme Board with full CCG executive and Non-executive membership – links to Governing Body and GP Membership	Requires multi-disciplinary team approach to neighbourhood working therefore alignment with primary care, social care and hospital care is key.
2	<p>Implement "Well Skelmersdale" asset based community approach in line with the "Well North" Programme aims.</p> <p>Key milestones:</p> <p>Part of Well North prevention Programme which is funded for 3 years until March 2018.</p>	Kathryn Kavanagh	<p>Engagement of local community.</p> <p>Adequate support from stakeholders including council colleagues and public health.</p>	Yes – reporting to Well North Hub. Also via "One West Lancashire".	Links to wider "Well North" Programme and methodology. Links to Healthier Lancashire Prevention workstream.
3	<p>Re-design the Musculoskeletal services in collaboration with health economy partners. This is a key Right Care priority.</p> <p>Key milestones:</p> <p>New referral protocol from November 2016</p>	Amanda Gordon	Financial risks if savings targets are not met.	Yes - scheme is overseen by CCG Clinical Executive and Membership Forum	Engagement with primary care GP's and orthopaedic providers

	(continued) Initiatives which we will focus in 2016/17 – 17/18	Scheme Owner	Risks	Do you have governance in place for this?	Main Interdependencies
4	<p>Primary care transformation - exploring all aspects of GP federation and mutual support. Support from Ernst Young to facilitate. This links to out of hospital strategy and MCP model.</p> <p>Key milestones:</p> <p>Report due November 2016 – key strands of project including Care Homes, Federation and Leadership.</p>	John Caine	Not all GP practices agree to the same common approach or model	Yes via GP membership council and updates reported to Governing Body.	Out of Hospital Strategy and MCP model
5	<p>Sustainability of Southport hospital and progression of the mid-Mersey “Alliance” work as part of Mersey STP. This includes maternity and paediatric vanguard work.</p> <p>Key milestones:</p> <p>Links to Mersey STP milestones and consultation timeframes. Further detailed work to be completed in 2017.</p>	Mike Maguire	<p>Public Consultation</p> <p>Capital funding</p>	Yes – separate governance re Mersey “Alliance” STP	Out of Hospital Strategy and workforce strategy
6	<p>A transformational approach to Mental Health by radically re-shaping mental health contract and informing Lancashire programme.</p> <p>Key milestones:</p> <p>Joint commissioning intentions agreed and mobilization plan finalized - Jan –March 2017</p>	Mike Maguire	Financial position of certain providers	Yes. Via current contracting process.	Capital strategy of providers

9 Must Do's	West Lancashire priorities				
	Transforming Community	Transforming Health Inequalities	Transforming Long term conditions	Transforming Urgent Care	Transforming Planned Care
1. Develop a high quality and agreed STP , and subsequently achieve what you determine are your most locally critical milestones for accelerating progress in 2016/17 towards achieving the triple aim as set out in the Forward View .	<p>Delivery of MCP model April 2017</p> <p>Integration work with council is key to neighbourhood team approach.</p>	Prevention work-stream important to common public health message / action across Lancashire		Links to Mersey STP	Links to Mersey STP
2. Return the system to aggregate financial balance . This includes secondary care providers delivering efficiency savings through actively engaging with the Lord Carter provider productivity work programme and complying with the maximum total agency spend and hourly rates set out by NHS Improvement. CCGs will additionally be expected to deliver savings by tackling unwarranted variation in demand through implementing the RightCare programme in every locality.	Reductions in ambulatory care sensitive conditions is key to restoring financial balance.	Work around respiratory health will have short and long term benefits. Reductions in COPD in Skelmersdale.	Rightcare spend on prescribing for long term conditions is relatively high. Work being undertaken to tackle medicines waste and third party prescribing	Joining up of out of hospital urgent care will contribute to reductions in ambulatory emergency admissions	<p>Highest rightcare area is Musculoskeletal costs. Re-design of services and single access point will ensure savings.</p> <p>Also, reduction in outpatient review clinics. "RightCare meets Carter" session within health economy.</p>
3. Develop and implement a local plan to address the sustainability and quality of general practice , including workforce and workload issues.	Ernst and young work re federated working and addressing practice variation			Out of hours included in community re-procurement and re-modelling of out of hospital urgent care	

(continued) 9 Must Do's	West Lancashire priorities				
	Transforming Community	Transforming Health Inequalities	Transforming Long term conditions	Transforming Urgent Care	Transforming Planned Care
4. Get back on track with access standards for A&E and ambulance waits , ensuring more than 95 percent of patients wait no more than four hours in A&E, and that all ambulance trusts respond to 75 percent of Category A calls within eight minutes; including through making progress in implementing the urgent and emergency care review and associated ambulance standard pilots.	Altering therapy and nursing team skill mix will help reduce admissions related to frailty etc (e.g reduction in over 65 admissions)	Reductions in COPD admissions will take pressure off system in Skelmersdale		Out of Hospital urgent care programme (as part of community re-procurement) will help manage demand in to ambulance and hospital	
5. Improvement against and maintenance of the NHS Constitution standards that more than 92 percent of patients on non-emergency pathways wait no more than 18 weeks from referral to treatment , including offering patient choice.					West Lancs currently has lowest average waiting times in country 4.4 weeks. Key to Demand management is getting MSK pathway right
6. Deliver the NHS Constitution 62 day cancer waiting standard , including by securing adequate diagnostic capacity; continue to deliver the constitutional two week and 31 day cancer standards and make progress in improving one-year survival rates by delivering a year-on-year improvement in the proportion of cancers diagnosed at stage one and stage two; and reducing the proportion of cancers diagnosed following an emergency admission.			One year survival rates are good , however focus needs to be on earlier diagnosis and work is underway with the Trust to improve pathway e.g Cancer radiology		

(continued) 9 Must Do's	West Lancashire priorities				
	Transforming Community	Transforming Health Inequalities	Transforming Long term conditions	Transforming Urgent Care	Transforming Planned Care
7. Achieve and maintain the two new mental health access standards : more than 50 percent of people experiencing a first episode of psychosis will commence treatment with a NICE approved care package within two weeks of referral; 75 percent of people with common mental health conditions referred to the Improved Access to Psychological Therapies (IAPT) programme will be treated within six weeks of referral, with 95 percent treated within 18 weeks. Continue to meet a dementia diagnosis rate of at least two-thirds of the estimated number of people with dementia.			High performer in Dementia diagnosis, and on target for IAPT and early intervention. Currently looking at improving referral routes from primary care – getting them to the right place .		
8. Deliver actions set out in local plans to transform care for people with learning disabilities , including implementing enhanced community provision, reducing inpatient capacity, and rolling out care and treatment reviews in line with published policy.	Links to care closer to home as part of pan-Lancashire strategy "Transforming Care"				
9. Develop and implement an affordable plan to make improvements in quality particularly for organisations in special measures. In addition, providers are required to participate in the annual publication of avoidable mortality rates by individual trusts.	Community re-procurement is key to reducing avoidable non-elective admissions			Overarching action plan at Trust – CQC report, lessons learnt from serious incidents, mortality improvement plan	

- Prevention and Population Health
- Primary Care
- Mental Health
- Acute & Specialised Care
- Children's & Young People Mental Health & Emotional Wellbeing
- Learning Disabilities
- Regulated Care
- Urgent & Emergency Care

We have added years to life but not life to years. If we fail to get serious about prevention then recent progress in healthy life expectancies will stall, health inequalities will widen, and our ability to fund beneficial new treatments will be crowded-out by the need to spend billions of pounds on wholly avoidable illness. Prevention and Population Health Programme is integral to the transformation and sustainability of the Lancashire and South Cumbria health and care system. We have identified key priorities and high impact actions to establish early momentum and underpin future work. **Our principle is to shift resources that will enable behaviour changes to prevent ill health, provide more pro active care and reduce demand; whilst promoting fully engaged communities and place based health and care system.**

DRAFT COPY

Our priorities for the next 5 years

- P 1 • **Priority 1**
Reduce demand by identifying and supporting individuals and families with complex needs.
- P 2 • **Priority 2**
Address the unwarranted variation in management of risk factors and care pathways
- P 3 • **Priority 3**
Improving outcomes for children and families
- P 4 • **Priority 4**
Achieving a fully engaged scenario with communities and people mobilised for improving their health and wellbeing
- P 5 • **Priority 5**
Embed health in all policies including employment, planning, transport and housing

Initiatives which we will focus in 2016/17 – 17/18

- High Impact Initiatives**
1. Population health approach to risk stratification and to achieve:
 - Proactive, anticipatory, joined up community based support for the top 5% complex individuals and families across all ages
 - Supporting self care and health coaching for the next tier (6%-20%) of the risk stratified population
 - Fully engaged confident and connected communities for health, wellbeing and resilience
 2. Falls prevention and crisis response
 3. Alcohol liaison and diversion schemes
 4. Improve access and uptake of reablement and rehabilitation
 5. CVD and Stroke prevention through improving the management of hypertension and atrial fibrillation
 6. Reducing admissions for childhood dental extractions
- National Must Dos**
1. Mental health and wellbeing:
 - suicide prevention
 - improving emotional resilience in CYP
 - improve dementia diagnosis
 2. Diabetes prevention
 3. Workplace health and wellbeing to reduce sickness absence and improve productivity
 4. Cancer prevention, screening and early detection
 5. Addressing RightCare priorities to reduce unwarranted clinical variation, in particular improve the uptake of shared decision making
 6. Supporting improvement of patient safety and reducing avoidable mortality

Analysis of Impact against Triple Aims

Care & Quality

- Reduction mortality attributable to problems in health care
- Reduction in severe harm attributable to problems in health care
- Increased proportion of people with positive experience of care
- Improved management of chronic conditions and their risk factors

Health & Wellbeing

- Improvement in healthy life expectancy and the slope index of inequality
- Reduction in avoidable deaths
- Reduced incidence of long term conditions
- Reduction in premature mortality of people with learning disability
- Reduction in suicide rates
- Improvement in cancer survival rates
- Improvements to staff health and wellbeing
- Improved community resilience and wellbeing

Finance & Efficiency

These initiatives, when implemented at scale are estimated to achieve a return on investment and/or net savings through a

- Reduction in 30 days readmission
- Reduction in emergency admissions
- Reduction in delayed transfers of care
- Reduction in proportion of ambulance calls that result in avoidable transportation
- Reduction in under 18 admissions due to preventable causes
- Reduction in primary care consultations and antidepressant prescription

We estimate this to be in the region of £225m in 2-3 years. We are currently estimating additional resources needed for implementing these initiatives.

An underpinning programme of transformational enablers includes:

A. Addressing the **wider determinants of health and wellbeing** through combined authority/Local Government. **B.** **Developing a 21st century workforce** across our system so that it is able to deliver our new models of care. **C.** Using **technology** to enable patients and our workforce to improve wellbeing, care, outcomes and efficiency.

- Primary care is considered to be the bedrock of the NHS and the setting for 90 per cent of all NHS patient contacts. However, primary care and in particular general practice, is under unprecedented strain and struggling to keep pace with rising demand, and it has become clear that action is needed to secure a responsive NHS, fit for the future.
- The vision: A Sustainable, high quality primary care with reduced variation and inequalities that underpins the development of new models of care in each of the LDP's
- The Model: Primary care providers working at scale through wider use of primary care staff and embracing new roles with access to routine medical care 7 days per week underpinned by high quality primary care estate, maximised use of technology with the integration and maximised utilisation of all 4 independent primary care contractors.

P1: Support and grow the primary care workforce; Double the growth rate in GPs, through new incentives for training, recruitment, retention and return to practice whilst also upskilling other health care professionals e.g. clinical pharmacists

P2: Better manage workload; Support struggling practices through resilience programmes and development programmes whilst shifting focus to prevention and early intervention. Integrating care and developing multidisciplinary teams

P3: Improve access to primary care services in and out of hours. building on the local GPAF pilots. to implement 7 day access to GP service to entire population and realigning OOH and Urgent Care Services

P4: Transform the way technology is deployed and infrastructure utilised; implementing CCG estates strategies and local digital roadmaps to secure high quality primary care estate to underpin new models of care

P5: Redesign how care is provided; implement new models of care to deliver sustainable services with improved outcomes and greater use of self-care, technology and wider workforce such as secondary care, community nurses, mental health, third sector

Initiatives which we will focus in 2016/17 – 17/18

1. Continue to implement the GP Forward View including:
 - £3 per head investment
 - GP Resilience programme
 - Growing the workforce e.g. Clinical Pharmacists
 - Time for Care GP development programme
 - Estates Technology and Transformation Fund
 - Time for care programme
2. Improve access to general practice services 7 days a week, focusing initially on the two Transformation Areas but rapidly rolling out across the STP footprint utilising central and local investment
3. Build on the learnings from the vanguards and identify next CCG/LDP ready to implement second wave of new models of care
4. Shift focus to early intervention, building on Healthy Living Pharmacies, children's eye screening services and dental smile for life – delivering better oral health.

DRAFT COPY

Care & Quality

- Sustainable, high quality primary care with less variation and fewer inequalities.
- Proactive, co-ordinated, holistic and person centred care
- No practices rated inadequate by CQC

Health & Wellbeing

- Improved and increased provision of self-care programmes including use of health care apps
- Improved oral health especially in Children under 5 years in Blackburn with Darwen and Blackpool

Finance & Efficiency

- Investment in primary care will enable a shift in activity from hospital to out of hospital care which will cost less and deliver better care closer to home.
- Primary care working at scale with appropriate technology and infrastructure.

Analysis of Impact against Triple Aims

An underpinning programme of transformational enablers includes:

A. Becoming a system with a **collective focus on the whole population**. **B.** **Developing communities and social networks** so that people have the skills and confidence to take responsibility for their own health and care in their communities. **C.** **Developing the workforce** across our system so that it is able to deliver our new models of care. **D.** Using **technology** to enable patients and our workforce to improve wellbeing, care, outcomes and efficiency.

Our Vision: *IAPT access standard and 24 hour A&E liaison and are key as part of taking pressure of acute trusts and inpatient settings and providing people with holistic care which addresses both physical and mental health needs and react early to people experiencing mental health crisis. This includes improved access to EIP, Eating Disorders and Perinatal. These include the opportunity to manage patients in the least restrictive setting and come closer to home. Prevention and early intervention are key with a particular focus on reducing self-harm and suicide and continuing to build upon our strong track record of diagnosing dementia as early as possible and offering robust post diagnostic support.*

P1: By improving access to consistent crisis and pre crisis pathways, we can improve patient experience, whilst reducing demand and improving operational resilience across the whole public sector (NHS, 111, Police, Acute and Specialist Mental Health Services).

P2: By improving early diagnosis and post diagnostic support care for older adults with dementia, we can promote independence & recovery and ensure people are cared for in the least restrictive setting.

P3: By improving prevention & more integrated management of physical & mental health services in primary care, we can improve life expectancy, reduce disability and reduce demand on mental health and acute services.

P4: By improving the care sector offer (older adult, mental health and rehabilitation) we can promote recovery, improve system efficiencies and reduce demand on health and social services across the system.

P5: By devolving spend and implementing a collaborative supply model for specialist mental health services for all ages, will better manage end to end pathways and deliver care in the least restrictive and appropriate settings. This will enable us to deliver financial & efficiency benefits, whilst delivering better outcomes and patient experience.

Initiatives which we will focus in 2016/17 – 17/18

P1: Redesigning a consistent 24/7 acute liaison service across The Health Economy for Emergency Departments and wider hospital settings. Developing a mental health response to support the clinical decision making of 111 / 999

P2: Redesign of Memory Assessment Services. Integrated discharge teams and intensive home support

P3: Redesign the IAPT pathways with integrated management of people with long term conditions, for e.g. COPD. Improve access to health checks for people with mental illness as part of the emerging new locality model. Shared care with people enduring mental health interventions

P4: Developing a discharge to access model across the Health Economy to ensure that individual's recovery is fully optimised to ensure that the patient is discharged into the least restrictive setting. To improve access to telecare/digital support into the care home sector

P5: To develop an integrated rehabilitation pathway across the health economy (to include improved market management / care in the least restrictive setting and proactive case management of individuals).

P6: Develop a Lancashire & South Cumbria wide suicide prevention strategy

DRAFT COPY

Five Year Forward View Deliverables

Ensure that 50% of acute hospitals meet the 'core 24' standard for mental health liaison as a minimum, with the remainder aiming for this level.

Provide 24/7 Crisis Response and Home Treatment teams as an alternative to acute admissions.

To continue to meet dementia diagnosis rate of at least 2/3s of the estimated number of people with dementia.

Provide additional psychological therapies for people with anxiety/depression, with the majority of the increase integrated with physical healthcare.

Eliminate out of area placements for non-specialist acute care.

Increase access to Individual Placement Support for people with Severe Mental Illness.

Increase access to evidence-based specialist perinatal mental health care.

Ensure that 50% of people experiencing 1st episode of psychosis start treatment within 2 weeks of referral.

Reduce suicides by 10% with local government and partners.

Analysis of Impact against Triple Aims

An underpinning programme of transformational enablers includes:

A. Becoming a system with a **collective focus on the whole population**. **B.** Developing communities and social networks so that people have the skills and confidence to take responsibility for their own health and care in their communities. **C.** Developing the workforce across our system so that it is able to deliver our new models of care. **D.** Using **technology** to enable patients and our workforce to improve wellbeing, care, outcomes and efficiency.

The Lancashire & South Cumbria health system has 5 main providers of acute and specialist services (excluding mental health) over 10 sites. The Trusts are East Lancashire Hospitals NHS Trust, Lancashire Teaching Hospitals NHS Foundation Trust, University Hospitals of Morecambe Bay NHS Foundation Trust, Blackpool Teaching Hospitals NHS Foundation Trust and Southport and Ormskirk Hospitals NHS Trust. Core secondary care services are provided by all 5 of the organisations; three Trusts provide specialist services. There are some very specialist services that we cannot provide locally and our patients need to travel out of area for care however there are also some services currently provided out of area that we could provide locally.

We have unacceptable variations in outcomes, quality and patient experience across our provides and population. We aspire to providing the best acute and specialist services that we can and will design our future acute care model on the best evidence base available.

P1

• Priority 1: Specify high quality operational standards for the delivery of acute and specialist services that will meet the needs of the Lancashire and South Cumbria population.

P2

• Priority 2: Consider and recommend options for appropriate acute and specialised service configuration in order to improve quality and outcomes.

P3

• Priority 3: Identify new models of care and delivery that will provide sustainable and accessible services for the population.

P4

• Priority 4: Integrate acute activity with community based services, delivering care closer to home wherever possible, providing specialist advice and support.

P5

• Priority 5: Create a resilient acute and specialist workforce by becoming excellent teaching and learning providers and economy.

Initiatives which we will focus on in 2016/17 – 17/18

- 1 Baseline the current operational service provision for the services in scope – to include strengths and challenges.
- 2 Agree care standards and service specifications for key acute and specialist services.
- 3 Assess options for future delivery of the following services:
 - vascular
 - Stroke
 - neurology
 - cancer
 - maternity
 - neonatology including NICU
 - paediatrics
 - critical care
 - end of life care
 - orthopaedics and MSK.
- 4 Make recommendations for the overall shape of acute and specialist services incorporating the outcomes of the urgent and emergency care workstream.

Analysis of Impact against Triple Aims

DRAFT COPY

Care & Quality

Reduction in neonatal mortality and stillbirths – of x by y
Improved cancer survival rates of x by y – for which cancers?
Achievement of nationally quality standards and care bundles.
Improve the rates of 'preferred place of care' for people on an EOL pathway.

Health & Wellbeing

Improved outcomes for cancer, heart, lung and liver disease.
Increase the contribution of A&S services to brief interventions.
Reduced variation in health outcomes, health inequalities and access to acute care.

Finance & Efficiency

Improve our outcomes – Right Care for acute and specialist services. Rapid assessment & diagnosis services (e.g. near patient testing), enhanced rehabilitation recovery, reduced LOS, effective discharge and repatriation, reducing beds by y.
Deliver more services virtually/ using technology and peripatetically = reduction in overheads.

An underpinning programme of transformational enablers includes:

A. Becoming a system with a **collective focus on the whole population**. **B.** **Developing communities and social networks** so that people have the skills and confidence to take responsibility for their own health and care in their communities. **C.** **Developing the workforce** across our system so that it is able to deliver our new models of care. **D.** Using **technology** to enable patients and our workforce to improve wellbeing, care, outcomes and efficiency.

Vision: To improve the quality of care and the patient/client experience across the sector. This requires a clear focus on appropriate, sustainable capacity and provision across residential, nursing and domiciliary care, which attracts and retains trained high-calibre staff to provide patients and residents with excellent care within a setting of their choice.

Workstream	Objectives/Outcomes	Outputs	Timeline Short, med, long (30,60, 90+ days)
1. Quality of Care	Improve quality of care with robust quality assurance and monitoring	<ul style="list-style-type: none"> Quality map provision across Lancashire & South Cumbria Develop consistent quality framework(s) and principles Develop policies to manage poor performance/best practice guides Develop consistent performance metrics/scorecard approach 	<p>60</p> <p>60</p> <p>30</p> <p>60</p>
2. The Children and Young People's Emotional Wellbeing and Mental Health Transformation Plan for Lancashire (2015-2020) was published in January 2016. The plan has been informed by consultation with children, young people and families and is based on comprehensive identification of needs and evidence based practice, to promote good emotional wellbeing and prevention of mental ill-health through early intervention, care and recovery. The document sets out the first iteration of a five-year plan for Lancashire which will be reviewed and updated continually to ensure it reflects the needs and aspirations of CYP and their families. The plan will support local implementation of the national ambition and principles set out in *Future in Mind – Promoting, protecting and improving our children and young people's mental health and wellbeing*; it aims to improve the resilience, emotional wellbeing and mental health of young people.

P1

- **Priority 1:** Promoting resilience, prevention and early intervention

P2

- **Priority 2:** Improving access to effective support – a system without tiers

P3

- **Priority 3:** Improving Care for the most vulnerable

P4

- **Priority 4:** Increasing Accountability and transparency

P5

- **Priority 5:** Developing the workforce

Initiatives which we will focus in 2016/17 – 17/18

1. Development of Specialist Peri-Natal mental health community services
2. Delivery of a Resilience Programme in Secondary Schools
3. Eating Disorders
4. Improving Access to Emotional Health & Wellbeing Support Services
5. Digital THRIVE
6. Tier 4 CAMHS

Analysis of Impact against Triple Aims

Care & Quality

A reduction in the risk of avoidable harm
 A reduction in the severity, duration, and the negative impact of mental health problems
 Improve outcomes by improving access to support and reducing waiting times
 Compliance with national standards

Health & Wellbeing

Increasing participation, life skills, employability, attitudes, motivation and wellbeing (particularly in relation to happiness, purposefulness and life satisfaction and confidence).
 Enabling people to access support earlier
 Reducing reliance on T3 and T4 CAMHS
 Appropriate use of services

Finance & Efficiency

Reduced Tier 4 bed activity
 Greater system oversight

Our priorities for the next 5 years

**DRAFT COPY**

An underpinning programme of transformational enablers includes:

A. Becoming a system with a **collective focus on the whole population**. **B.** **Developing communities and social networks** so that people have the skills and confidence to take responsibility for their own health and care in their communities. **C.** **Developing the workforce** across our system so that it is able to deliver our new models of care. **D.** Using **technology** to enable patients and our workforce to improve wellbeing, care, outcomes and efficiency.

Our priorities for the next 5 years

P1

• Priority 1: Integrated Urgent Care

P2

• Priority 2: Enhanced Primary Care

P3

• Priority 3: Enhanced Acute Care

P4

• Priority 4: Mental Health

P5

• Priority 5: Integrated Care

Priority 6: Out of Hospital Care

Initiatives which we will focus in 2016/17 – 17/18

1 Integrated Urgent Care

- Integrated Virtual Clinical Hub
- Early Transfer to OOH Providers (Direct booking equivalent)
- Expanding access to patient records, care plans and SCR
- Implementation of NHS 111 Commissioning Standards/ Models

2 Enhanced Primary Care

- Transition to mainstream Extended GP Practice 17/18
- LHE Plans for Primary Care clusters/ locality team working
- Community Pharmacy developments

3 Enhanced Acute Care

- 7 Day UEC Initiatives
- Delivery against 4 Mortality Standards
- LHE Pathway review/ redesign and designation of UEC Facilities
- Workforce development including improved links and collaboration between HEE and UECN/Leads
- Payment model initiatives (Based on national outcomes tbc)

4 Mental Health

- 24/7 Access to MH Crisis and Liaison

5 Integrated Care

- UEC elements of Digital Roadmap
- UEC elements of Personalisation
- Demand, capacity and flow management (A&E Improvement)

6 Out of Hospital Care

- UEC elements of Independent Care
- UEC elements of Community Services
- Discharge and DTOC Processes

Health & Wellbeing

UECN Vision to provide highly responsive services, for adults and children with urgent care needs, that delivers care as close to home as possible and are safe, sustainable and of a consistent high quality. This will minimise disruption and inconvenience, supporting independence and ensuring the most serious needs are treated in a timely way with the right expertise to maximise outcomes.

Care & Quality

- **Delivery of 7 Day Services for UEC**
- **Delivery of Priority Clinical Standards (including 4 Mortality Standards)**
- **Delivery of UEC Outcomes (Enhanced Acute Care; Enhanced Primary Care; Out of Hospital Care)**

Finance & Efficiency

- **A&E Improvement Plans & Boards will deliver efficiency in system processes**
 - **Discharge & DTOC processes**
 - **Capacity & Demand management**
 - **System wide escalation responses**

Analysis of Impact against Triple Aims

DRAFT COPY

Lancashire was chosen as one of six fast track areas in 2015 to develop and implement system wide plans to transform services for those with Learning Disabilities and/or Autism. The Right Track plan was signed off by all CCG and LA organisations.

There are 1,519,892 registered people Pan Lancashire with 6056 registered as having a learning disability across the 8 CCG's, in April 2016 there were 109 hospital in-patients and a trajectory was set to reduce to 89 by end of March 17

The Lancashire vision is consistent with the national service model and is that:

People with a Learning Disability and/or Autism, including people with complex and challenging behaviour, can lead fulfilling lives in the community supported by 'ordinary' services with appropriate support from staff with skills to support them and their needs in their local community, whenever possible

Lancashire intends to reduce the reliance on non-secure beds by 70% and substantially reduce the numbers of people who come into contact with secure services. This ambition is being achieved by focussing on putting in place high-quality individual packages of care and creating a hub and spoke community support model.

P1

- Priority 1: Embed co-production throughout the TCP work programmes to ensure all care and services are designed to meet the needs of this population

P2

- Priority 2: Improve quality of life by treating people with dignity and respect. They should have a choice over where they live and be supported to live safely in their own homes wherever possible

P3

- Priority 3: Redesign the community offer to provide integrated services and enable person-centred, planned, proactive and coordinated care with early intervention and preventative support

P4

- Priority 4: Improve equity of outcomes with early intervention and preventative support, better access to mainstream NHS services and specialist care available in the community

P5

- Priority 5: Reduce reliance in in-patient services, redesign the in-patient pathway, commission and quality assure to reduce admissions and reduce lengths of stay

Initiatives which we will focus in 2016/17 – 17/18

- 1) Production of a Pan-Lancashire Housing Strategy, with market position statement and map demand to supply
- 2) Implementing procurement systems
- 3) Undertake a communication and engagement programme
- 4) Develop an integrated community service specification, commission and implement.
- 5) Adopt National care and treatment review policies
- 6) Deliver a physical health and prevention, increase GP registers, annual health checks, health action plans and hospital passports
- 7) Outline the requirements to establish a safe, sustainable workforce
- 8) Develop pooled budget arrangements with robust governance arrangements to support it
- 9) Continue to safely discharge patients that have been in hospital long term and ensure adequate hospital provision for future needs

Analysis of Impact against Triple Aims

Care & Quality

Reduce in-patient numbers from 16/17 109 to 89
17/18 89 to
Reduce lengths of stay
Reduce readmissions

Health & Wellbeing

Increase participation in GP DES for LD registers to 100%
Increase Annual Health Checks to 80%
Increase Health Action Plans year on year

Finance & Efficiency

£194 Million Pooled Budget
Reduce projected growth
Increase efficiency

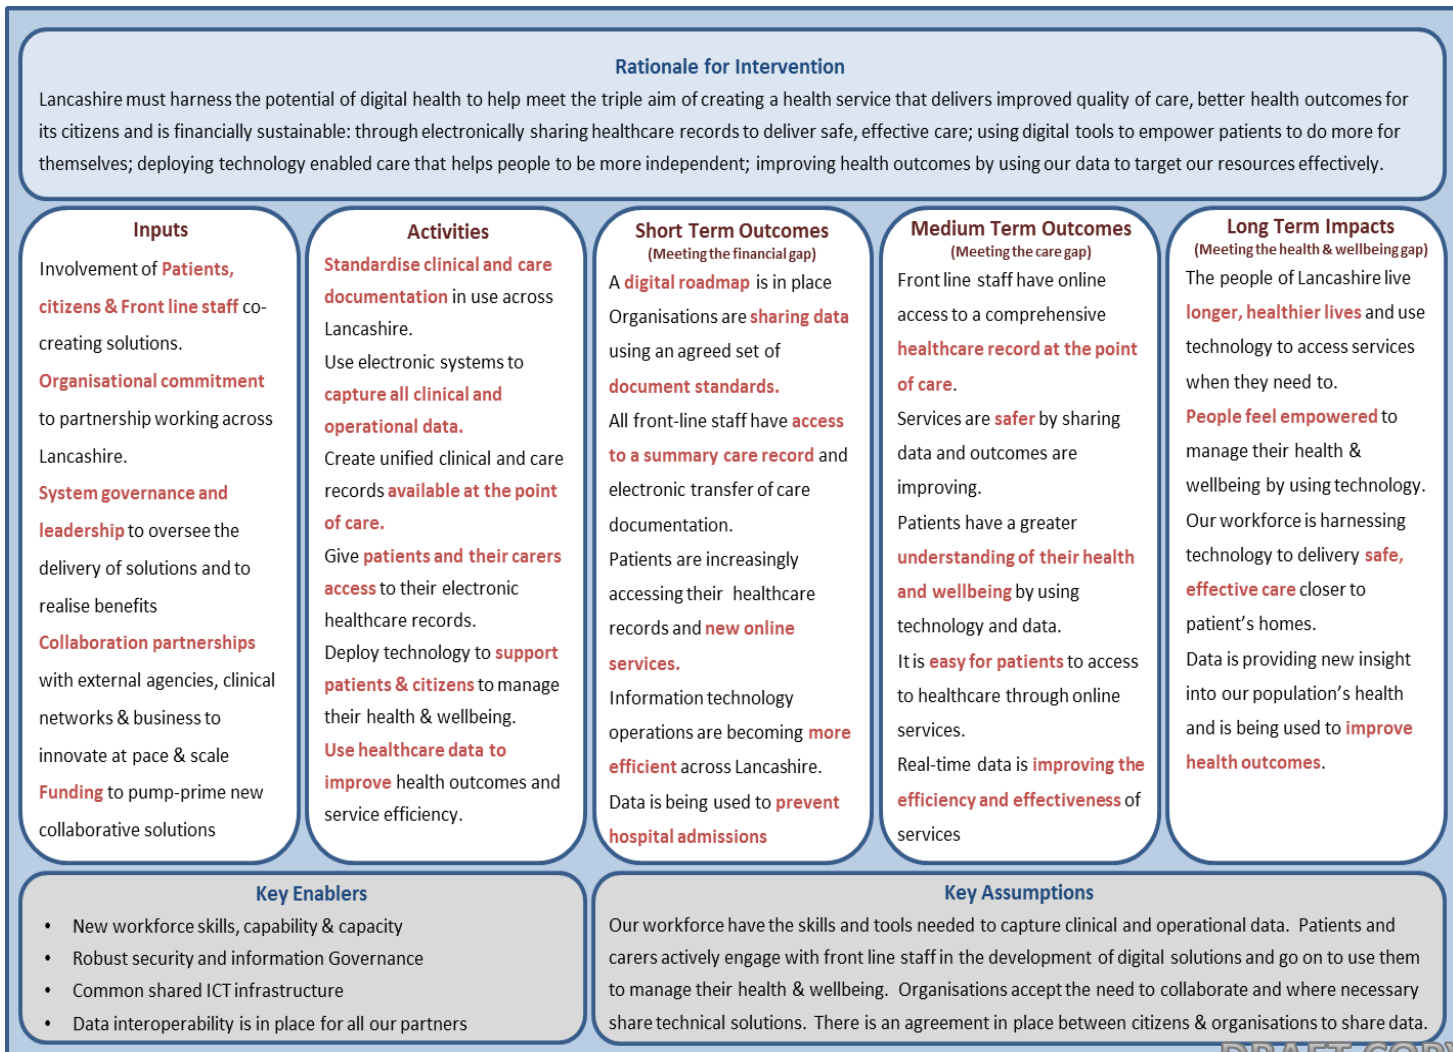

DRAFT COPY

An underpinning programme of transformational enablers includes:

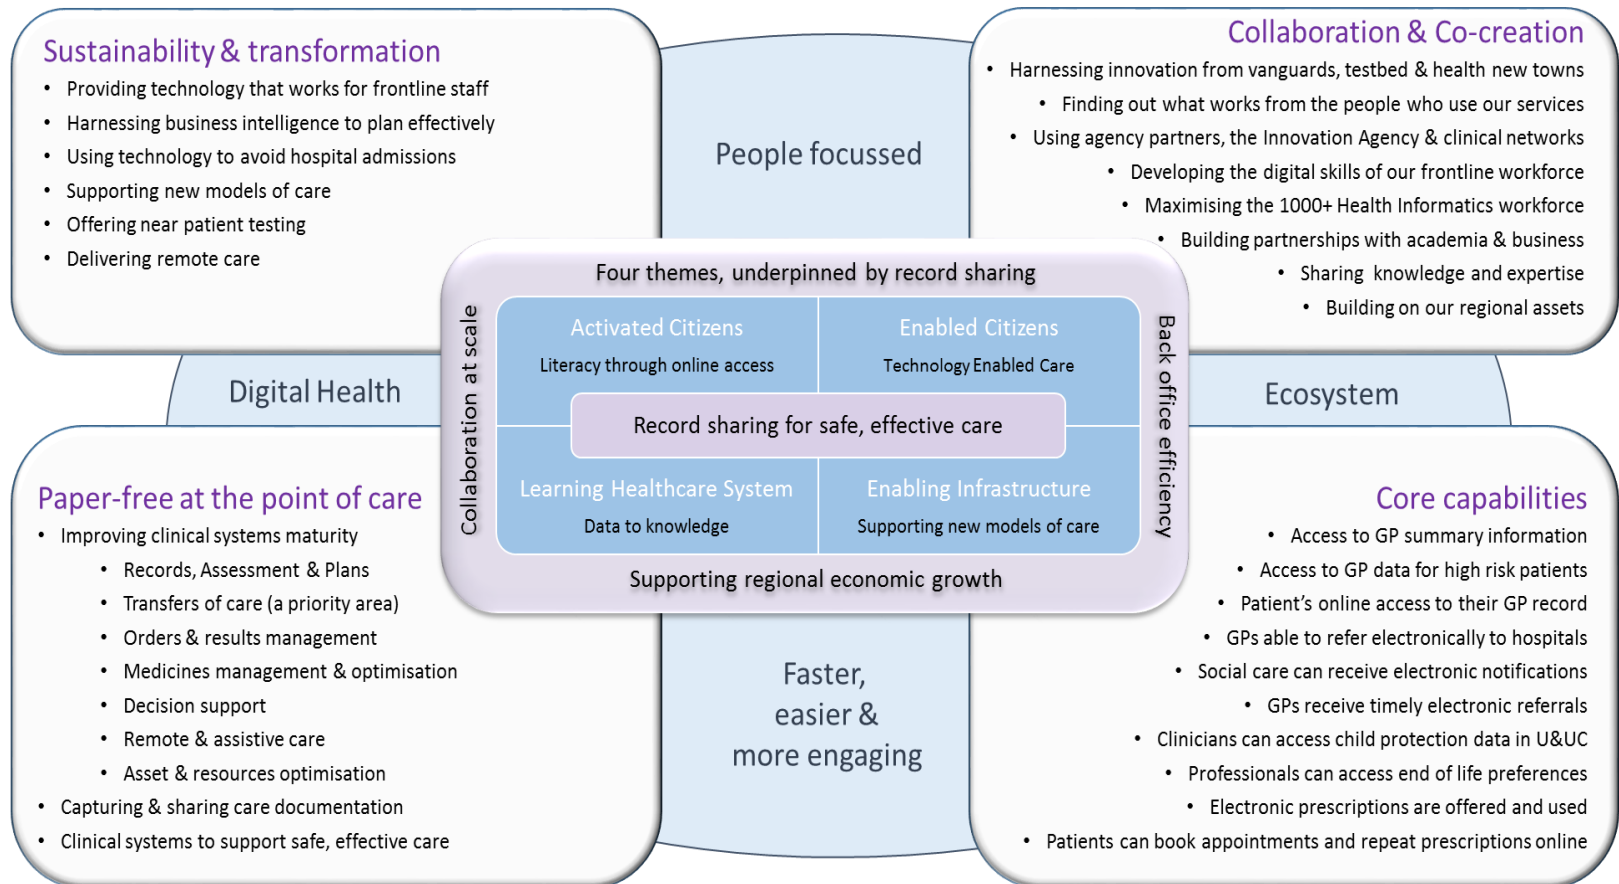

- A. Becoming a system with a collective focus on the whole population. B. Developing communities and social networks** so that people have the skills and confidence to take responsibility for their own health and care in their communities, including the use of advocacy and support services. **C. Developing the workforce** across our system so that it is able to deliver our new models of care. **D. Using technology** to enable patients and our workforce to improve wellbeing, care, outcomes and efficiency.

Enablers

Digital health – Vision: Faster, easier & more engaging for people

- In June 2016, the CCGs were required to submit a Local Digital Roadmap (LDR) alongside our Sustainability and Transformation Plan (STP). Lancashire's LDR covers eight CCGs, six provider trusts (including Southport and Ormskirk), three councils and the North West Ambulance Service. Cumbria has a separate LDR, however the direction of travel is well aligned through the Better Care Together Programme.
- The LDR has been developed through the Digital Health Board and wide ranging consultation with both clinical and non-clinical leaders. The document sets out five broad strategic themes which drive the national requirements to delivery paper-free at the point of care and improvements across ten universal capabilities. The themes are:
 - Electronic record sharing - Supporting safe, effective and efficient care by sharing healthcare records across organisational boundaries
 - Empowered citizen – Giving people access to their healthcare records, to new online services and seeking to improve digital health literacy
 - Enabled Citizens – Using technology to enable care closer to / in the home, supporting new models of care that allow patients to avoid admission or to get home sooner and to deploy technology that allows professionals to test patients in the community, potentially offering early diagnosis of disease
 - Learning healthcare system – Making better use of our data to predict need and manage our population's health. Creating capability within the workforce to use data and a collaborative approach to how we store and process it
 - Enabling IT - ensuring IT works for our staff and supports new models of care, where people can work seamlessly across organisational boundaries and within the patient's home
- Over the next three years as part of the STP programme, these strategic themes will be translated into a portfolio of work that will be threaded to all parts of the change programme. Facilitating cross-organisational working, creating new approaches to improve access to services and driving operational efficiency.
- The implementation of the digital portfolio is initially focussed on supporting system-wide sustainability. In the first year, the aim is to engage with frontline staff and patients to identify areas of improvement, establish areas of good practice and create capability across the system. In year 2, the focus would shift to scaling solutions at pace and scale, continuing with back office consolidation and the creation of a Learning Healthcare System. From year three onwards, the approach will be to use the new digital capabilities to underpin system-wide transformation. This intensive three-year programme has six interrelated delivery components:
 - *Increasing capacity in primary and community care* – bringing together a resource to support GP Practices and other community assets to embed digital solutions into services. Improving access by offering online services, streamlining processes and removing unnecessary bureaucracy
 - *Managing demand across the system* – embedding a 'think digital' approach to service redesign, using online tools to signpost patients appropriately and developing a 'self-serve' approach wherever possible
 - *Avoiding unnecessary hospital admissions* – Using our data, in combination with improvements in care coordination, to proactively respond to the changing needs of patients with chronic conditions. To improve the flow of information between organisations and ensure electronic processes actively promote adherence to clinical pathways and RightCare
 - *Enable early discharge and avoid re-admission* – Using remote care technology to help patients to be safely be discharged from hospital with extended support into their homes. Improving the digital maturity of hospital systems to support the care of patients in a range of care settings
 - *Promoting prevention* – Extending the use of digital tools to improve health literacy in our population. Encouraging the adoption of health and wellbeing tools in conjunction with health coaching to motivate people into positive health behaviours
 - *Driving efficiency & change with pace & scale* - Developing our workforce's capability to delivery technology enabled change. Driving out operational efficiencies and standardisation of the IT infrastructure as part of a programme of activities established under the banner of back office efficiency

1. Increasing capacity in Primary & Community Care

- Development of a Primary Care Digital Transformation Bundle
 - Delivery of GP Forward View targets (digital elements)
 - Delivery of LDR Universal Capabilities
 - Capability building in using remote care tools / apps / social media / texting (Flo)

2. Managing demand

- Deployment of online transactions tools across the care system
 - ‘Think Digital’ approach to operational process redesign
 - Online triage tools & patient advice
 - Electronic self-scheduling tools for people to manage their appointments
- Accelerated deployment of optimised electronic referrals
 - County-wide deployment of an online advice & guidance tool
 - Streamline processes around booking management services
 - Improve directory services and referral workflow tools
- Records integration across urgent and unplanned care services
 - Sharing of condition flags e.g. end of life care
 - Automated workflow and task allocation into community services

3. Hospital admission avoidance

- Creating new capabilities in predictive analysis
 - Online caseload management tools for care-coordination teams / frontline staff
 - Bringing together hospital, community, primary and social care data in near real-time
 - Development of new predictive risk algorithms with academic partners
- Digital tools for long-term condition management
 - Deployment of the App prescribing platform
 - Deployment of remote care / monitoring solutions into the homes of LTC patients
 - Accelerated deployment of Care Home Connect - remote diagnostic and telehealth solutions
- Accelerated deployment of Lancashire’s Health Information Exchange (LPRES)
 - Creation of a shared record view
 - Extending the functionality of the Information Sharing Gateway
 - Integration of app & sensor data into the shared record view

4. Enable early discharge from hospital / re-admission avoidance

- New models of delivery for remote care, e.g. tele-renal
 - Digital discharge solutions (TTO Digital)
- Digital Maturity - Paper-free at the point of care
 - Real-time electronic Transfers of care
 - e-Shared care plans
 - Electronic bed boards; Care homes, community & stepdown
- Deployment of near-patient testing solutions and sharing test results

5. Prevention agenda

- Development of integrated apps & a health coaching approach to support the whole systems prevention model
- Digital health literacy; online access to records, health & wellbeing apps, online resources

6. Driving efficiency, change at pace & scale

- Enabling back office efficiency (8 work streams underway)
- Developing digital skills in the workforce and with the public, e.g. Go-On Lancashire

Summary:

- £30m STP over three years
- £10m NHS England Technology
- £6m Recurrently through back office efficiency by 20/21

STP Work Stream Digital leads							
Primary Care	Regulated Care Sector	Prevention	Urgent & Emergency Care	Acute & Specialised	Children & Young People	Learning Disabilities	Mental Health

Central Lancs	Pennine Lancashire	Fylde Coast	Bay Health Partners	West Lancashire			
Back Office Consolidation							
Networks	Data Centre	Interoperability	End User Compute	Unified Communications	Contracts	Cyber Security	Business Intelligence

Empowered Citizen (active & online)

By 17/18:

95% of GP Practices offering, SCR, Patient Online, (records, appointments & repeat prescriptions)
All secondary providers accessing the enhanced summary care record (or SCR)
Clinical teams & citizens can access an Apps portal (ORCHA) to prescribe apps

By 20/21:

All Practices offer enhanced online services (triage, signposting, video consultation, App & social prescribing)
All citizens can access all their published electronic care documents online via LPRES
All citizens with a long-term care need can access & contribute to the health record using apps
All citizens can access online tools to help manage their own health and wellbeing

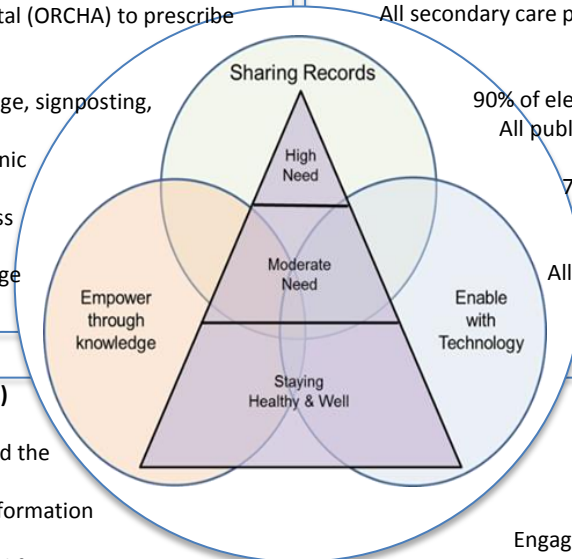

Integrated Record Sharing

By 17/18:

Implemented regional Health Information Exchange (LPRES). All Health & care (H&S) partners connected and publishing
Implemented a single data sharing governance process & tool. All H&S partners signed up to IG Gateway tool
All secondary care providers sending e-discharges & offering e-referral slots

By 20/21:

90% of electronic care documentation transacted over LPRES
All public sector bodies & major independent & 3rd sector partners connected to LPRES
75% of appointments across the H&S system can be booked electronically. LPRES integrates with all STP recognised healthcare Apps
All Paper-free at the POC & universal capabilities met

**Learning Healthcare System (Population health)**

By 17/18:

Agreed plan for the consolidation of our data and the associated business intelligence resources
Started deployment of a regional child health information System, underpinning child protection (CPIS)
Started design work on an explicit consent model for secondary uses

By 20/21:

Frontline staff access a range of real-time decision support, predictive analytics, benchmarking tools
A mechanism is in place to systematically analyse cross-agency population data in near real-time
Citizens actively engaged in managing their consent preferences to share data for healthcare research

Enabled Citizen (technology-enabled care)

By 17/18:

Workforce Digital Skills Academy established
A 'think digital' resource kit is available for transforming teams
Engaged citizens through Healthwatch (& others) to help co-create new digitally-enabled services
An online solutions catalogue is available

By 20/21:

All citizens in care homes have access to remote telehealth / diagnosis to avoid unnecessary hospital admission
All citizens with a long term needs are routinely offered technology-enabled care as appropriate to their needs
Near-patient diagnostic testing 'lab in a bag' is routinely used across the STP footprint

Enabling technology - By 17/18

Free public access Wi-Fi solution in place across all H&S partners
Mobile solutions operational for over most frontline staff (Single Wi-Fi SSID)
Single network infrastructure in place. Plans for pooled ICT budget approach

By 20/21

Integrated public sector network architecture established
All frontline staff able to access an integrated care record at the point of care
Unified solutions in place for telecomms, data storage & clinical support systems

The four Better Care Fund Plans developed and implemented across the Lancashire and South Cumbria STP footprint have laid the ground for a mature approach to collaborative working and a move towards integration of health and social care planning, commissioning and delivery.

The plans and their delivery have supported partners in working through the necessary legalities, mechanisms of budget pooling, policy compliance and building relationships across sectors. And have provided a firm foundation and framework for further integrated working. That all partners are active within the BCF arena is a testament to the commitment and relationships that have grown and the challenges that have been overcome. This has extended to the growing involvement of the voluntary sector and District Councils.

Delivering the BCF plans has resulted in significant progress ranging across:

- Joint financial management and reporting
- Consistent monitoring and reporting on activity and performance using common data sets and agreed KPIs.
- The use of common terminology and understanding of the links between activity and outcomes of the wide range of services delivered across the STP footprint.

Delivery of integrated service provision across health and social care, in terms of absolute performance against plans, when measured against the prescribed metrics, and as reported by each, there has been a varied level of success. Being able to analyse this in terms of locality and activity and openly share learning, across boundaries, including those of the BCFs, has grown trust and is supporting common approaches.

Being able to recognise what works best, on a BCF scale, has provided the impetus to focus on services such as reablement and rehabilitation and support their growth as part of a wider system.

The four BCFs have provided Health and Wellbeing Boards with a clear point of focus on integration of health and social care, the challenges that it creates and most importantly the opportunity it represents. Being able to consider the complex issues and “practice” the difficult conversations within the relatively safe and contained BCF arena has prepared the way for the role of that such bodies will play as the STP is implemented.

All partners recognised that the BCF 2015/16 was a first phase, in the main about creating, bedding in and testing out opportunities for formally pooling budgets, joint planning and delivery. The above describes what this has produced.

As the BCF(s) continue forward, their role is to become more focussed on enabling more ambitious approaches in pushing the boundaries of integration. This means using the BCF(s) to:

- Support joint commissioning of integrated care that includes truly cross sector teams.
- Explore opportunities to commission and deliver integrated care on a locality footprint, aligned to STP plans
- Where it is the most effective mechanism create or widen existing pooled budgets to meet the requirements of individual or groups of integrated services and influence the reshaping of the totality of health and social care spend. This is not, however, at the exclusion of the use of other, often more informal, forms of collaboration where those fit best.
- Develop and test out the mechanisms that will support STPs such as more sophisticated evaluation frameworks, reporting systems and use of business intelligence.
- Get better at being able to describe and quantify
 - The links between activity with outcomes
 - The links between BCF activity and performance with anticipated and actual savings
- Engage all partners in opening up integration beyond health and social care, especially the voluntary sector and District councils, to enable them to become co-production and delivery partners. Significant work is underway with both with clear expectations of changes in year that see explicit delivery by both against BCF priorities.
- Manage the challenges created by financial constraint and level of available resources.
- Create plans that are clear on areas of focus, to best use future BCF funding including any additional funding.

In addition the BCF(s) will continue to manage the delivery against the 2016/17 BCF plan constituent schemes and activities and respond to the live challenges faced in the priority areas.

The object of the plan is to provide the leadership and organisational development required by leaders across the system to support them in the implementation of the changes identified in the Healthier Lancashire & South Cumbria (HL&SC) Sustainability & Transformation Plan.

Rather than have OD providers and planners 'imagine' what would be required, the process has involved a series of diagnostic and in-depth interviews with a cross section of 20 leaders who will be actively involved in making the HL&SC changes happen. The interviews were designed to understand what L&OD support the HL&SC health and care system will require. The interviewees included executives, lay members, clinicians, directors of professional functions and others, from health providers and commissioners, local government and the third sector.

DRAFT COPY

Progress

The series of interviews has now been completed and their content has now been drawn together into a 'first cut' of an L&OD plan for HL&SC STP. The next step is a full day workshop on the 28th October 2016 in which the interviewees - together with a representative group of other front line leaders - will moderate the 'first cut' of the plan. The outcome of the workshop will be an explicit and detailed plan of what is required – and for whom, and what the key development priorities should be. The plan will be available by the beginning of November.

Emerging Themes

It is essential to 'cut to the chase' and ensure that *all* L&OD interventions are now focused on the implementation of the STP. The exception is that associated with talent management.

- There needs to be a focus on obtaining a return on the investment in leadership development that has already taken place.
- Leaders need to be confident and competent to work across geographical and organisational boundaries to make sustainable change happen.
- This requires the development of 'place-based' skills of influencing, negotiating and bargaining in addition to those associated with authority, command and control. There will need to be enhanced technical skills associated with change management.
- It also requires opportunities for locally based 'communities of interest' to be helped to work together to develop trust and understanding and to establish how fundamental changes to the health and care system might best be achieved.
- This will include developing high levels of competence in public and staff involvement.
- There needs to be a particular emphasis on the needs of some clinicians, non-executives and other public representatives and on bringing the professional cadres in Finance, HR and Estates together within a health and care economy, since they will be pivotal on building the new provider organisational forms required.
- There is a need for the demand side of L&OD (Trusts, CCGs, Local Authorities etc.) to be better integrated through an impartial 'broker' between them and the L&OD providers to ensure that the best use of the resources is made.

- Communications and Engagement Overview
- Activity already undertaken and impact
- Communications and Engagement Plan – October 2016 – December 2016
- Digital Engagement strategy

An Involvement, Communications and Engagement (ICE) strategy has been co-designed by C&E partners from health and care organisations across Lancashire and South Cumbria. Healthier Lancashire and South Cumbria will establish co-ordination, consistency, best practice and robust inclusive and assured engagement across Local Health Economy areas as part of their LDPs within the STP footprint.

Activities must drive real involvement with the public, health and social care workforce, local elected members and MPs, Third Sector and patient groups, support services, statutory organisations and media.

IC&E activities will focus on doing things once and doing it well whilst recognising the different geographies. Delivery will consider different requirements and allow activity to be tailored by LDPs with the understanding that the delivery needs to be different, visual and 'real'. A centralised system will be used to capture, analyse and utilise intelligence and data across the STP footprint to inform more effective ICE activity. Region wide and workstream related engagement will be led by the STP team.

Widespread understanding of the need for change amongst all sections of the communities across Lancashire *needs to be visual and 'real'*

Delivery of the activity will build upon the vast amount of work which has already taken place within LDPs and local organisations and make best use of local knowledge, skills, experience and relationships that have been developed within communities.

Delivery of the Involvement, Communications and Engagement strategy will:

- Create widespread understanding of the need for change amongst all sections of the communities across Lancashire.
- Raise awareness of what individuals and communities can do to improve their health and resilience and achieve a shift in attitudes and behaviours.
- Provide robust evidence of inclusive engagement sufficient to facilitate implementation and withstand any legal challenge to the process.
- Ensure that communications and involvement activities and messages are consistent, coordinated and aligned across each of the LDPs.
- Ensure that feedback from local residents from all sources is collated and analysed and informs the STP and change process.
- Ensure democratic representatives have the opportunity to influence and contribute to the programme via the MPs Panel, 1-2-1 briefings, Local Government group briefings and continual oversight of HWBs, Health & Wellbeing Partnerships & HOSC.

Awareness of what individuals and communities can do to improve their health and resilience and achieve a shift in attitudes and behaviours *needs to be a social movement where these discussions develop with individuals.*

Below is a summary of the ICE activities undertaken across Healthier Lancashire & South Cumbria and by each of the LDPs. Feedback and contributions from stakeholders, public, patient representative groups, workforce and democratic officials has had significant impact and influence on the ICE strategy and plan.

Democratic engagement

- Healthier Lancashire and South Cumbria delivered a series of briefing sessions with more than 100 district and county Councillors
- MPs across the STP footprint have been engaged through an event in House of Commons, July 2016. Invitations have been sent to local MPs to get involved with local programmes by three LDPs.
- In addition central 1-2-1 Briefings have taken place with 4 MPs since July 2016
- Healthier Lancashire & South Cumbria have presented to the Overview and Scrutiny Committee in addition to presentations by North Lancashire & South Cumbria.
- Local Councillors have attended workshop events in Fylde Coast and North Lancashire & South Cumbria
- Written briefings have been sent to all MPs across all 5 LDP areas.

Workforce engagement

- Transformation workshops have been undertaken or planned by each LDP. North Lancashire & South Cumbria and Fylde Coast programmes have delivered extensive new model design workshops as Vanguard sites. These include activities with GPs, local government, staff, clinicians, VCFS organisations, patient voice representative groups.
- Healthier Lancashire & South Cumbria have undertaken TU, staff side workshops and established Clinical networks and a Clinical Professionals Board as part of the on going governance structure.
- Pennine Lancashire programme delivered Transformation workshops bringing together clinicians, Third Sector and patient groups along with a large-scale networking event in September 2016.
- Regular newsletters and briefings have been distributed to staff and stakeholders by established programmes in North Lancashire & Cumbria and Fylde Coast.
- Pennine Lancashire have made use of video case studies on social media to share good practice examples of change that is making a difference.

Public engagement

- Engagement and involvement has been carried out across the STP footprint by the LDPs and constituent organisations.
- More extensive consultations have taken place in Fylde Coast and North Lancashire and South Cumbria footprints including listening events, surveys, interactive feedback sessions, public reference groups.
- In North Lancashire and South Cumbria Third Sector sessions have been delivered on maternity, children's health, LD, complex care, older adults and LGBT.
- Public events, advertising and digital engagement has also started in the Pennine LDP and will start in Central in November.
- Video case studies and animated infographics have been created in Pennine, North Lancashire and South Cumbria and Fylde Coast.
- Fylde Coast have delivered a series of roadshow events across the region and delivered events in partnership with local Healthwatch.
- Public consultation on community services is underway in West Lancashire with public and stakeholders

Centralised data & intelligence

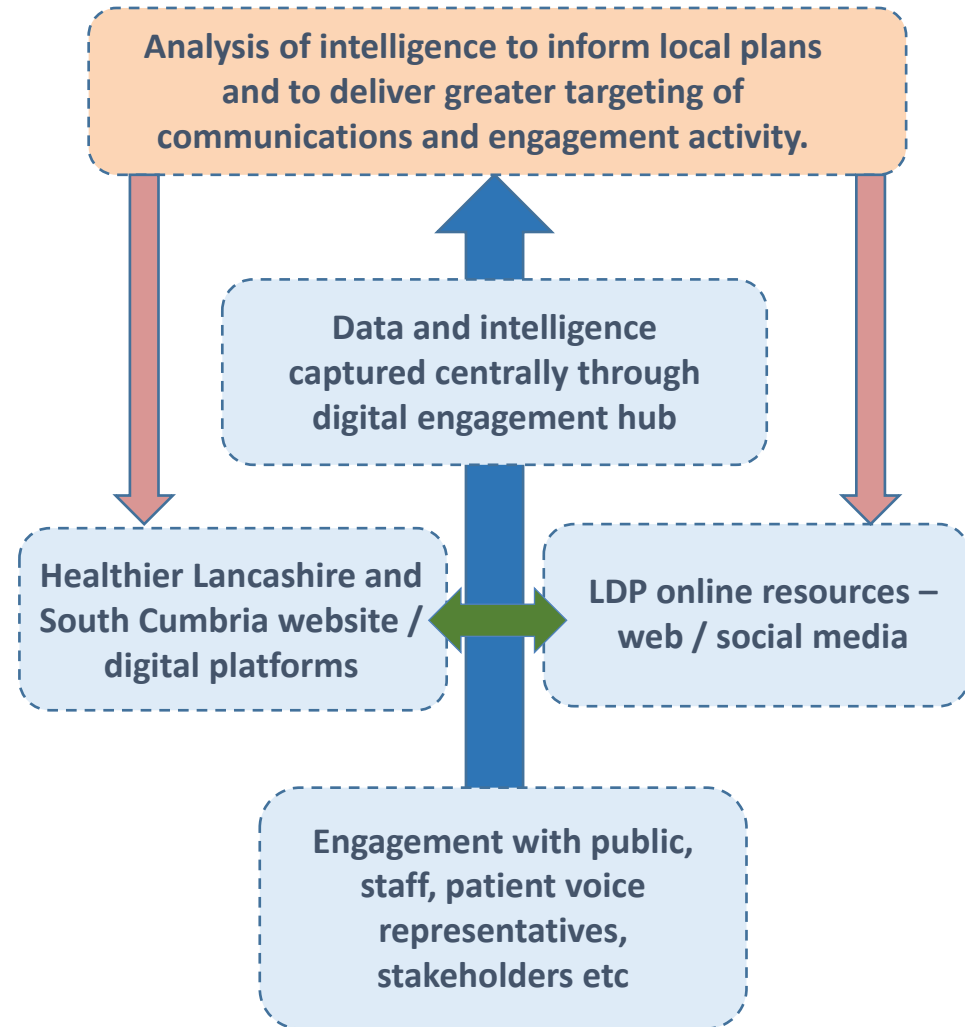

- A nationally recognised Digital Engagement Hub is being developed to support the LDPs in collation and analysis of intelligence from stakeholders and responses to consultations.
- Community participation outcomes will be measured via the Digital Engagement Hub allowing for a range of data analysis options locally and across the STP area to influence planning and delivery of engagement activities, especially in efforts to involve hard to reach groups.

Utilising and developing existing digital brands

- Digital engagement will be delivered through existing and established brands within each of the LDP areas.
- Campaigns and initiatives delivered across the STP areas will be tailored for local areas based on local knowledge and relationships.

Demonstrating joined up approach

- A two-way flow of visitors between websites within each of the LDP areas and a Healthier Lancashire and South Cumbria site will demonstrate the joined up activity across the STP footprint.
- Areas of best practice and achievement will be demonstrated through the Healthier Lancashire and South Cumbria digital platforms and encourage public, stakeholders, democratic officials and patient representatives to get involved with their local programmes.

Proposed components of the Healthier Lancashire and South Cumbria digital communications strategy
