

# Healthcare HQ

## Clinical Van Briefing

Inspire East Lancs now have a clinical mobile van for use across all of our areas, including Rossendale, Hyndburn, Pendle, Ribble Valley, and Burnley. We are currently scoping out venues, where we can park the clinical van, where our hard to reach service users will find it accessible and easier to attend.

Inspire's healthcare team will deliver a number of interventions including harm reduction messages and needle exchange provision. Our overall aim is to ensure that all service users have access to a local service including a wide range of clinical interventions.

It is envisaged this will not only have a positive impact on the health and wellbeing of our service users, but will provide benefits to the wider community. We intend for the van to be made available to other aspects of the service, this will include:

- Outreach
- Assessments
- 1-2-1 Risk and suitability appointments.
- Dr's Appointments
- Oral swab drug testing

## Clinical interventions delivered

- Blood borne virus (BBV) screening
- Hepatitis A and B vaccinations
- Signposting and onward referral
- Healthcare assessments
- Needle exchange provision
- Alcohol assessments
- Naloxone training
- Health promotion
- Basic wound care
