

An order could be placed for LCC's Street Lighting to manage the device

LCC would need a list of where the SpID would be located over a 6 monthly period (these locations must first be approved by LCC). LCC would then charge up the device and move it from location to location. There is enough money remaining in the capital programme budget against this scheme for this to be carried out for around 2 years (£50 per deployment, recharging every 2 weeks and allowing for additional mounting plates).

LCC periodically deploy to the following sites:

West	Brierfield	Halifax Road	U19670	23	Brierfield Bound	Near Pennine Way
West	Brierfield	Higher Reedley Road	C664	59	Uphill Traffic	SL 59 Nr Broadhurst Way towards Moorland Dr
West	Brierfield	Kings Causeway	U19670	25	Halifax Rd Bound	SL 25 both Sides nr Marsden Heights Cottage - Towards Halifax Rd
West	Brierfield	Kings Causeway	U19670	25	Brierfield Bound	SL 25 both Sides nr Marsden Heights Cottage - Towards Walverden Rd
West	Brierfield	Kings Causeway	U19670	18	Brierfield Bound	SL 18 heading towards Walverden Road nr Weatherhill Crescent
West	Brierfield	Clitheroe Road	B6248	13	Fence Bound	SI 13 Towards M65 bridge
West	Brierfield	Clitheroe Road	B6248	14	Brierfield Bound	SL 14 Towards Brierfield Centre

LCC suggest including Broadhurst Way and Colne Road/Burnley Road entering Brierfield.

Give the SpID to LCC

LCC would be happy to take the SpID for use in the Pendle area at no further cost to the committee.
