

(FORM A: INTERNAL BID)

**BID FOR CAPITAL FUNDING FROM AREA COMMITTEES
PRO FORMA**

A. Short project title: Carriers Row Drainage

B. Bid submitted by: Scott Whalley, Engineering Manager

C. On behalf of (please include contact details): Ward councillors

D. Amount requested: £1,000

E. Brief details of project: Resolve highway drainage issues by installing valves within the existing wall to enable surface water from the highway to discharge into the river

F. Main outcomes to be achieved: To reduce risk of fluvial flooding to properties on Carriers Row. The scheme will prevent the passage of water from the river which comes through the highway drainage holes in flood conditions

G. When will project be implemented? As soon as possible

H. Who will undertake the project works? Approved local contractor

I. Is there match funding for the project from elsewhere? No

If so, please give details: LCC is rebuilding a length of undermined highway retaining wall opposite 15 Carriers Row within the next few months and therefore this scheme will act as a contribution to an LCC capital scheme for the wall (PBC is to pay for the valves)

J. Are there long-term revenue consequences and how will these be funded?

Future maintenance will remain with LCC as a highway asset and therefore there are no revenue consequences for PBC
