

Uniroyal Global Improvements

I have spoken to Wayne Forest at Uniroyal Global and he has informed me of the following improvement timetable:

Improvement	Date To be Completed
S4 line to be attached to new chiller unit	9 th August 2019
S1 and S2 to be attached to new chiller unit	October 2019
Old stack removal	End Of 2019
Permit application submitted to Pendle BC	End of 2019

He also confirmed that all lines are now on the RTO. Having visited the site and dealt with the project manager, I saw a considerable amount of investment and large scale improvements taking place, many of which aren't detailed on this document as they do not relate to any of the complaints made. I am satisfied with the progress that the company are making/have made.
