

Update Report: Barrowford & Western Parishes Committee 5th July 2023

23/0285/FUL: Roaming Roosters, Higham

Given that there are some re-grading works required to the grass verge to the west of the proposed access, the Council's Environment Officer (Trees) has asked that an informative is added to any decision notice which would ensure that works are only carried out, outside the bird nesting season.

The Informative note would be as follows:

Any works required to hedgerows or trees shall not be carried out during the bird nesting season (March – October inclusive) unless accompanied by an up to date bird nesting survey.

This does not change the overall recommendation of the report, which it to approve the application, subject to conditions.
