## KPI's By Exception - Red & Amber KPIs

KPI	Good Performance is...	Current Target	Current Value	Status	Notes
WM 8c KPI - Percentage of the total tonnage of household waste which has been recycled - Rolling Year %	Aim to Maximise	18.00%	17.02%		<p>These figures represent the data submitted to WasteDataFlow in March 2026 for the rolling year January 2025 to December 2025. WDF deadlines are set at national level and data for 24/25 will not be confirmed until around December 2026.</p> <p>The reported performance of 17.02% is below the annual target of 18% and is an increase/decrease on the same quarter last year, which was 17.41%.</p> <p>The figure is impacted upon by the total tonnages collected inclusive of recycling and all none recycling streams which include street cleansing, fly tips and bulky household waste.</p> <p>The quarters figure will have been impacted by a period of inclement weather resulting in disruption to the service. The indicator will have similarly been impacted by the Recycling Officers involvement in the roll out of the weekly food waste collection. The new scheme was successfully introduced on the 30th March.</p> <p>Over the 4th Quarter, frontline teams have reported 551 contaminated bins. In response to these reports and following inspection of the container, the recycling officer has written to 113 residents and completed 55 visits residential and 5 commercial visits to discuss contamination issues.</p> <p>Data provided by LCC in January 2026 shows that Pendle is generally recycling more than our nearest neighbours but is also collecting more waste through our none recycling schemes such as bulky household collections, flytips and grey bins.</p> <p>LCC Data additionally captures recovery rates from Household waste recycling centres creating a difference between PBC and LCC reports. LCC record our recycling rate as <b>26.3%</b> inclusive of green and HWRC weight. HWRC's are reported to be recovering 66.69% of material presented at the facility in Barnoldswick.</p>
